AQUARIUM

Animal Coloring & Activity Book

20 Ocean & River Animals to Color, Solve & Draw

For explorers ages 3–8

Animals, facts and puzzles by Wild Atlas

Example book. Riverbend Aquarium is a fictional venue.

Hello, Grown-Ups!

Welcome to Riverbend Aquarium!

Every animal in this book gets two pages. On the left is a puzzle or something to draw. On the right is the animal to color, with real facts to read aloud.

Made for kids who aren't reading yet

Read the one-line instruction once. The little picture next to it reminds them what to do: draw a line, find, circle, count, draw, or trace.

Crayons and colored pencils work best

Markers may show through to the next page.

Answers

Many answers are printed upside down at the bottom of the page. The rest are in the answer key near the back.

A free animal pack!

This book includes a free animal pack for the Wild Atlas app, a safe, ad-free animal encyclopedia for kids. Turn to the last page to claim it.

This Book Belongs To

My favorite animal is

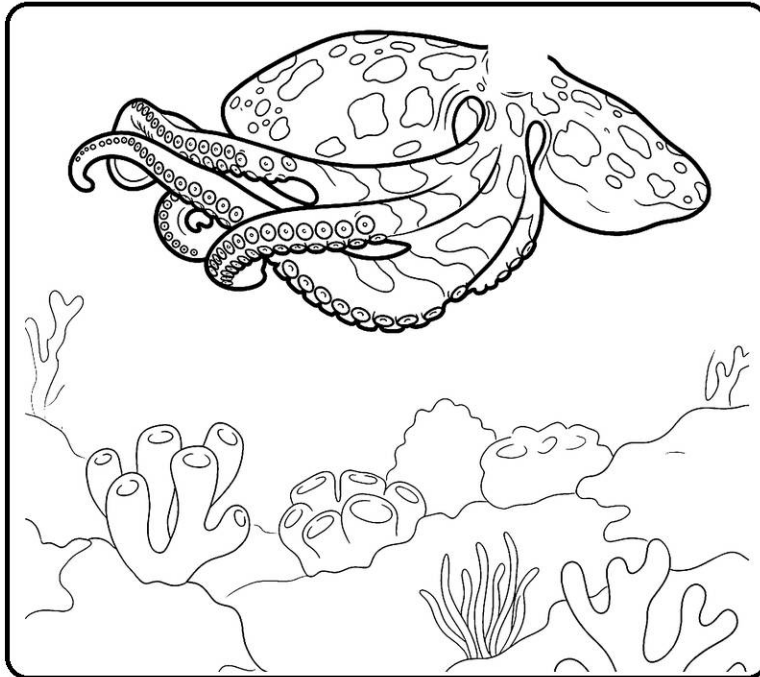

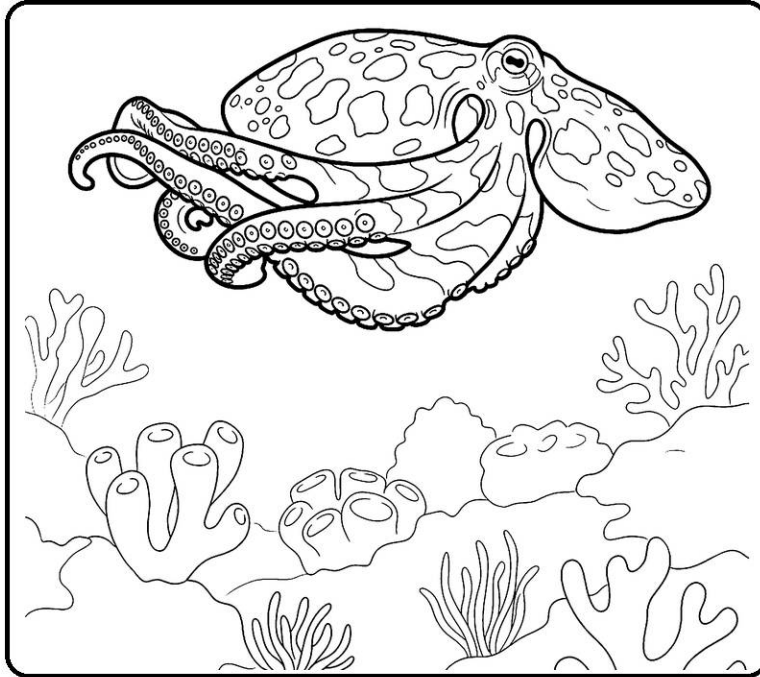

Draw it here!

A large rectangular area defined by a dashed line, intended for a child to draw their favorite animal.

Spot the Difference

Find 5 things missing in the bottom picture. Circle them!

○ ○ ○ ○ ○

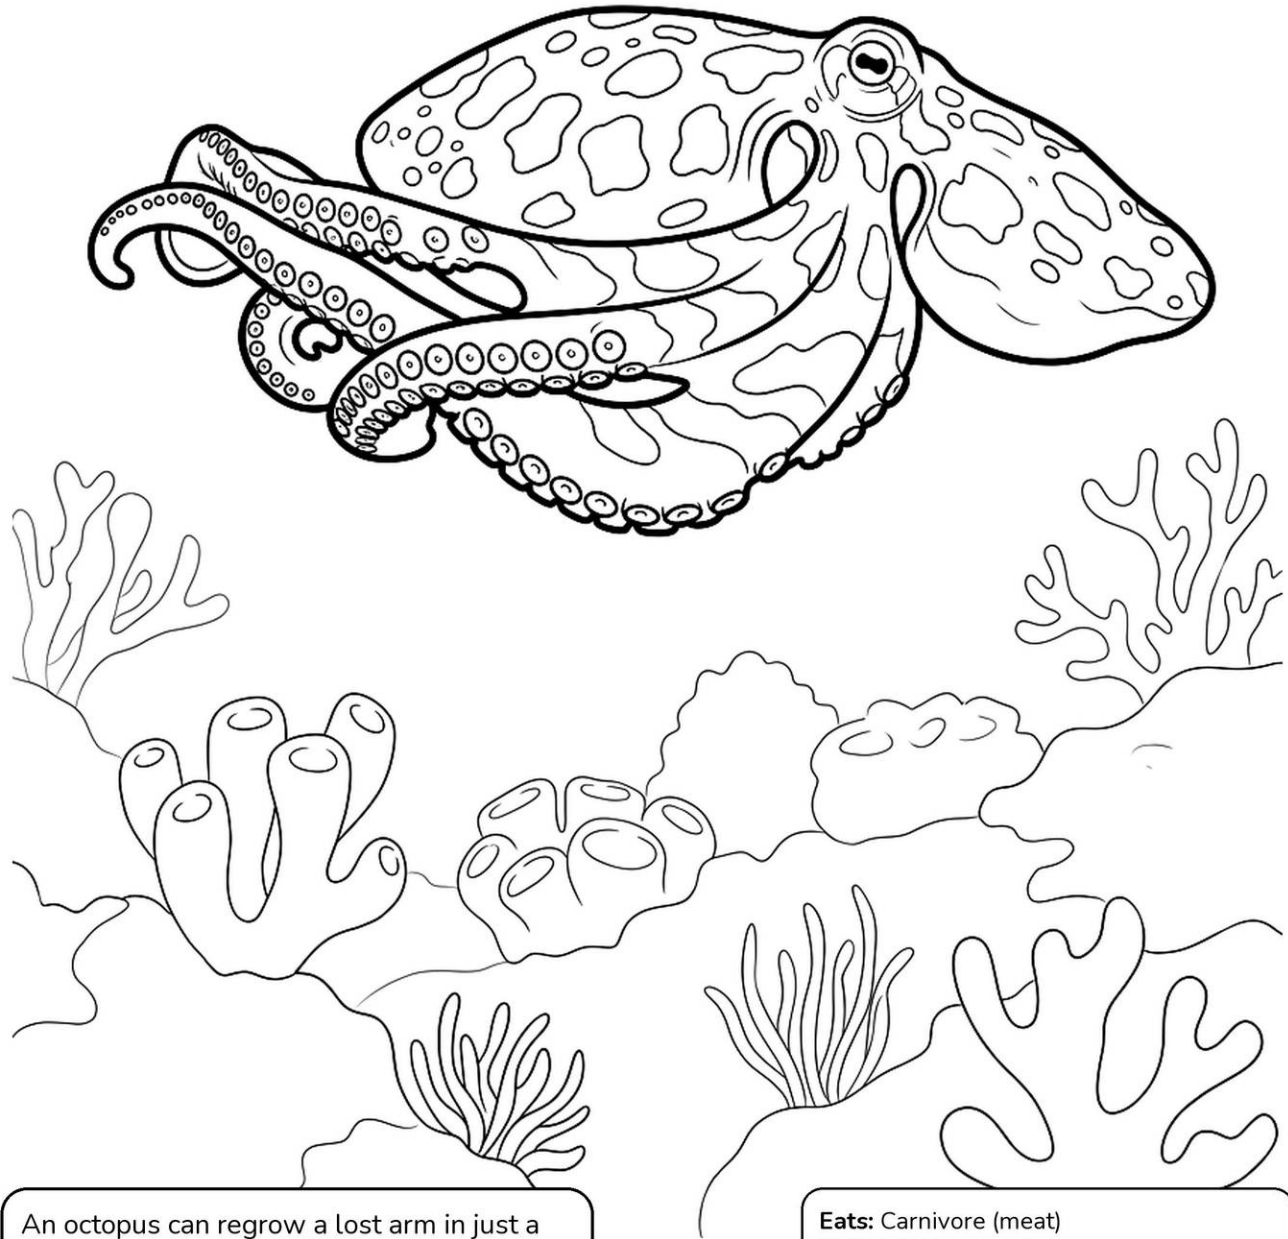

Octopus

Riverbend Aquarium

Octopuses have three hearts — two pump blood to their gills and one pumps blood to the rest of their body.

When an octopus swims fast, its main heart stops beating!

An octopus can regrow a lost arm in just a few months.

Eats: Carnivore (meat)
Habitat: Ocean waters
Danger: Low Risk

Octopus

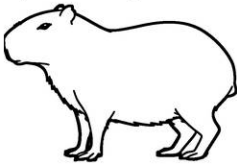

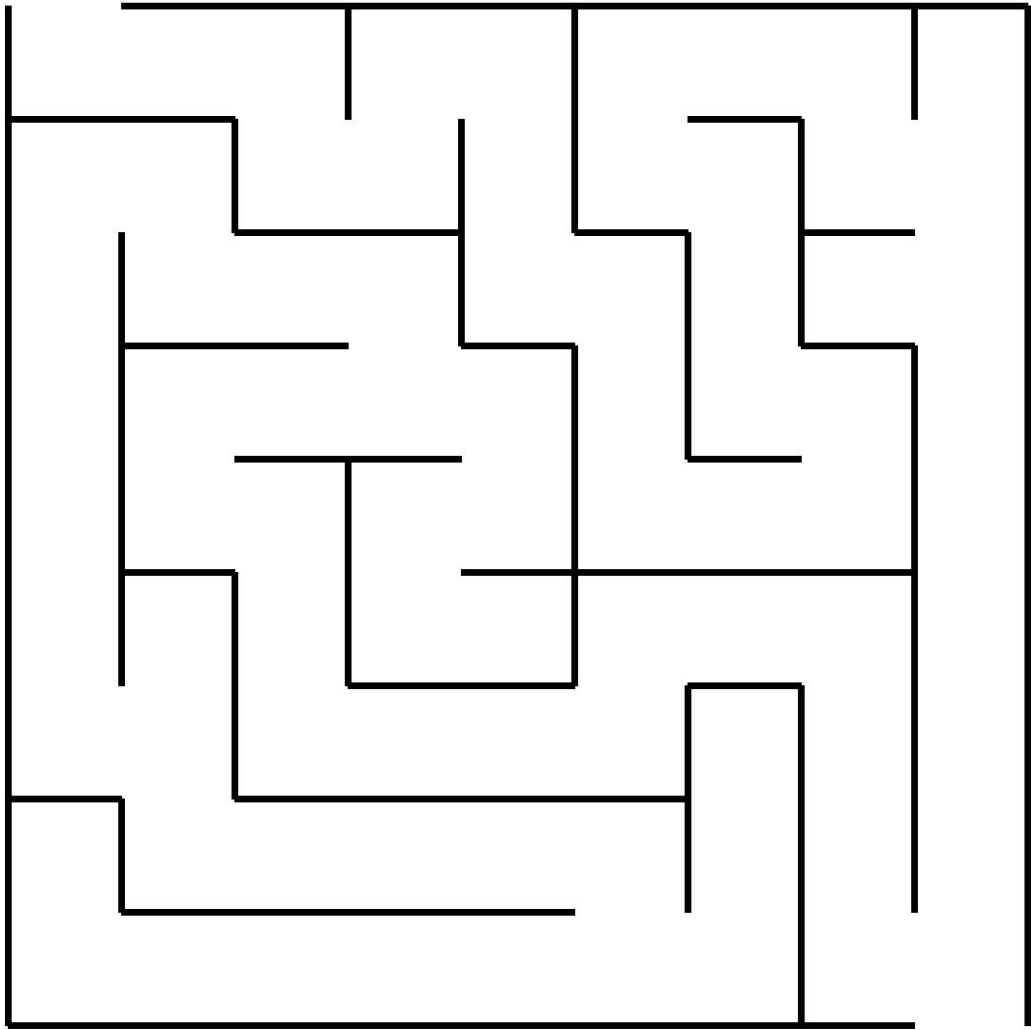

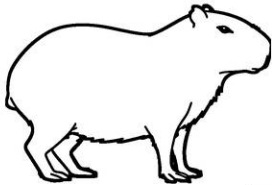

World's oceans

Amazing Maze

Help the little capybara find its mom!

Capybara

Riverbend Aquarium

RIVERBEND
AQUARIUM

Capybaras eat their own poop to get extra vitamins from their food.

Their teeth never stop growing, so they chew tough grasses to keep them short.

They love to take mud baths to cool off on hot days.

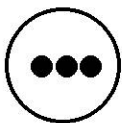

Eats: Herbivore (plants)
Habitat: Rivers, lakes, and wetlands
Danger: Safe

Capybara

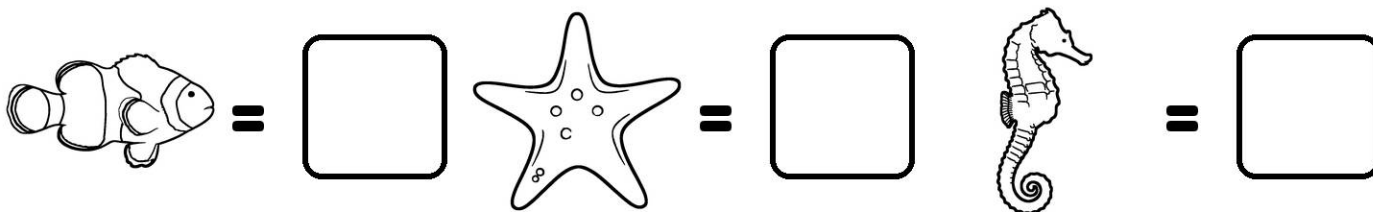

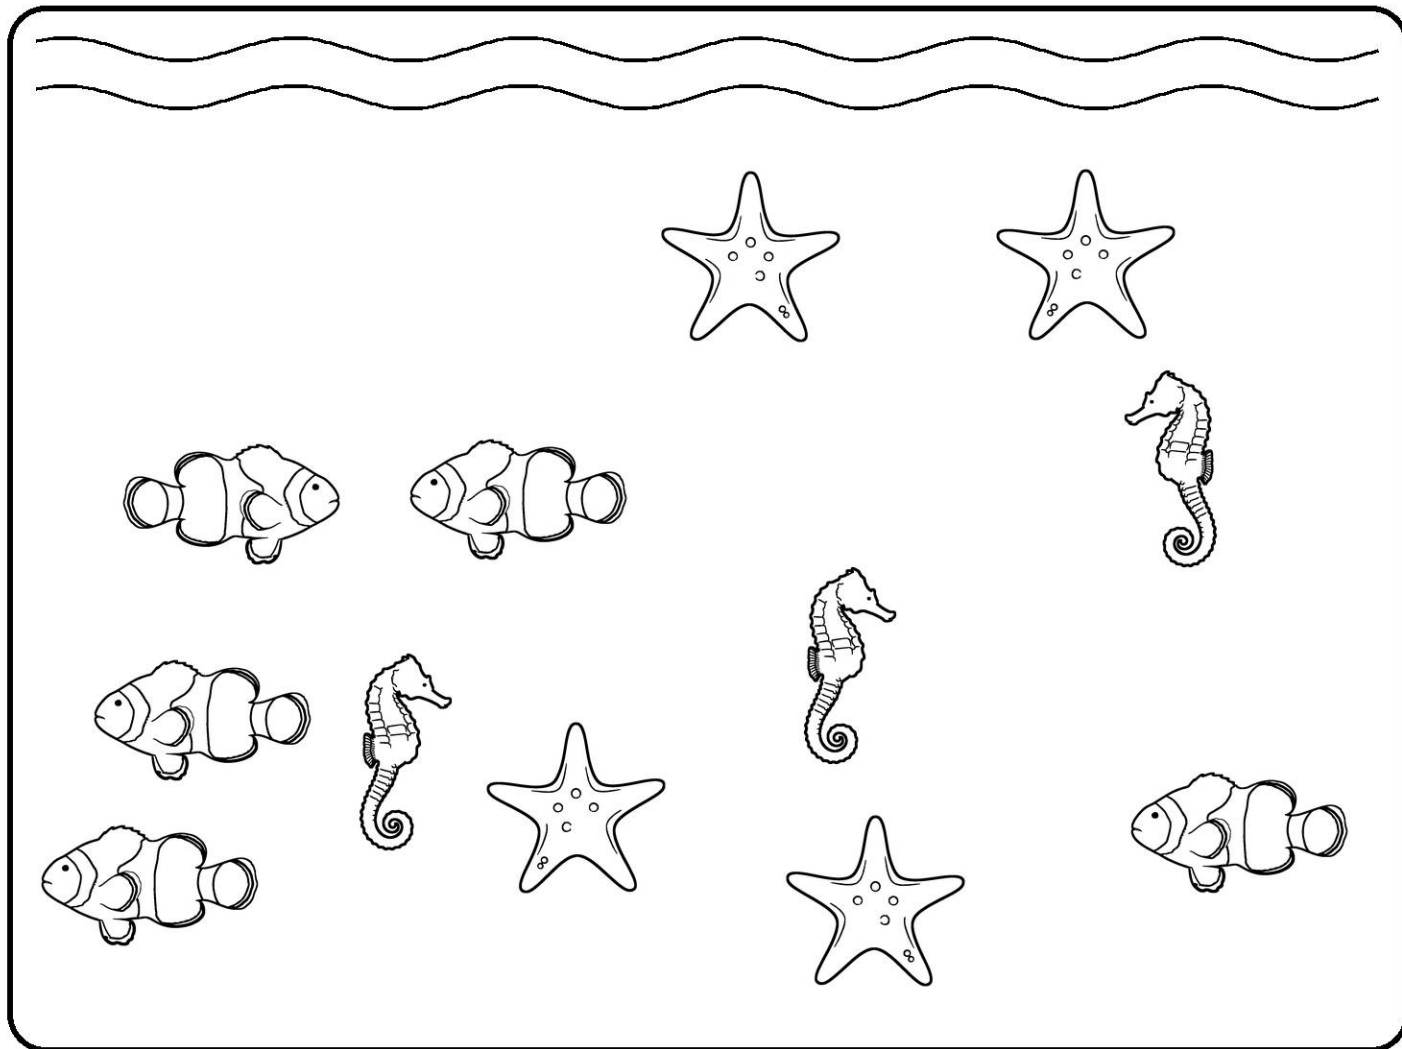

South America

Count & Color

Count each animal. Write the number. Then color the picture!

Answers: Clownfish 5, Starfish 4, Seahorse 3

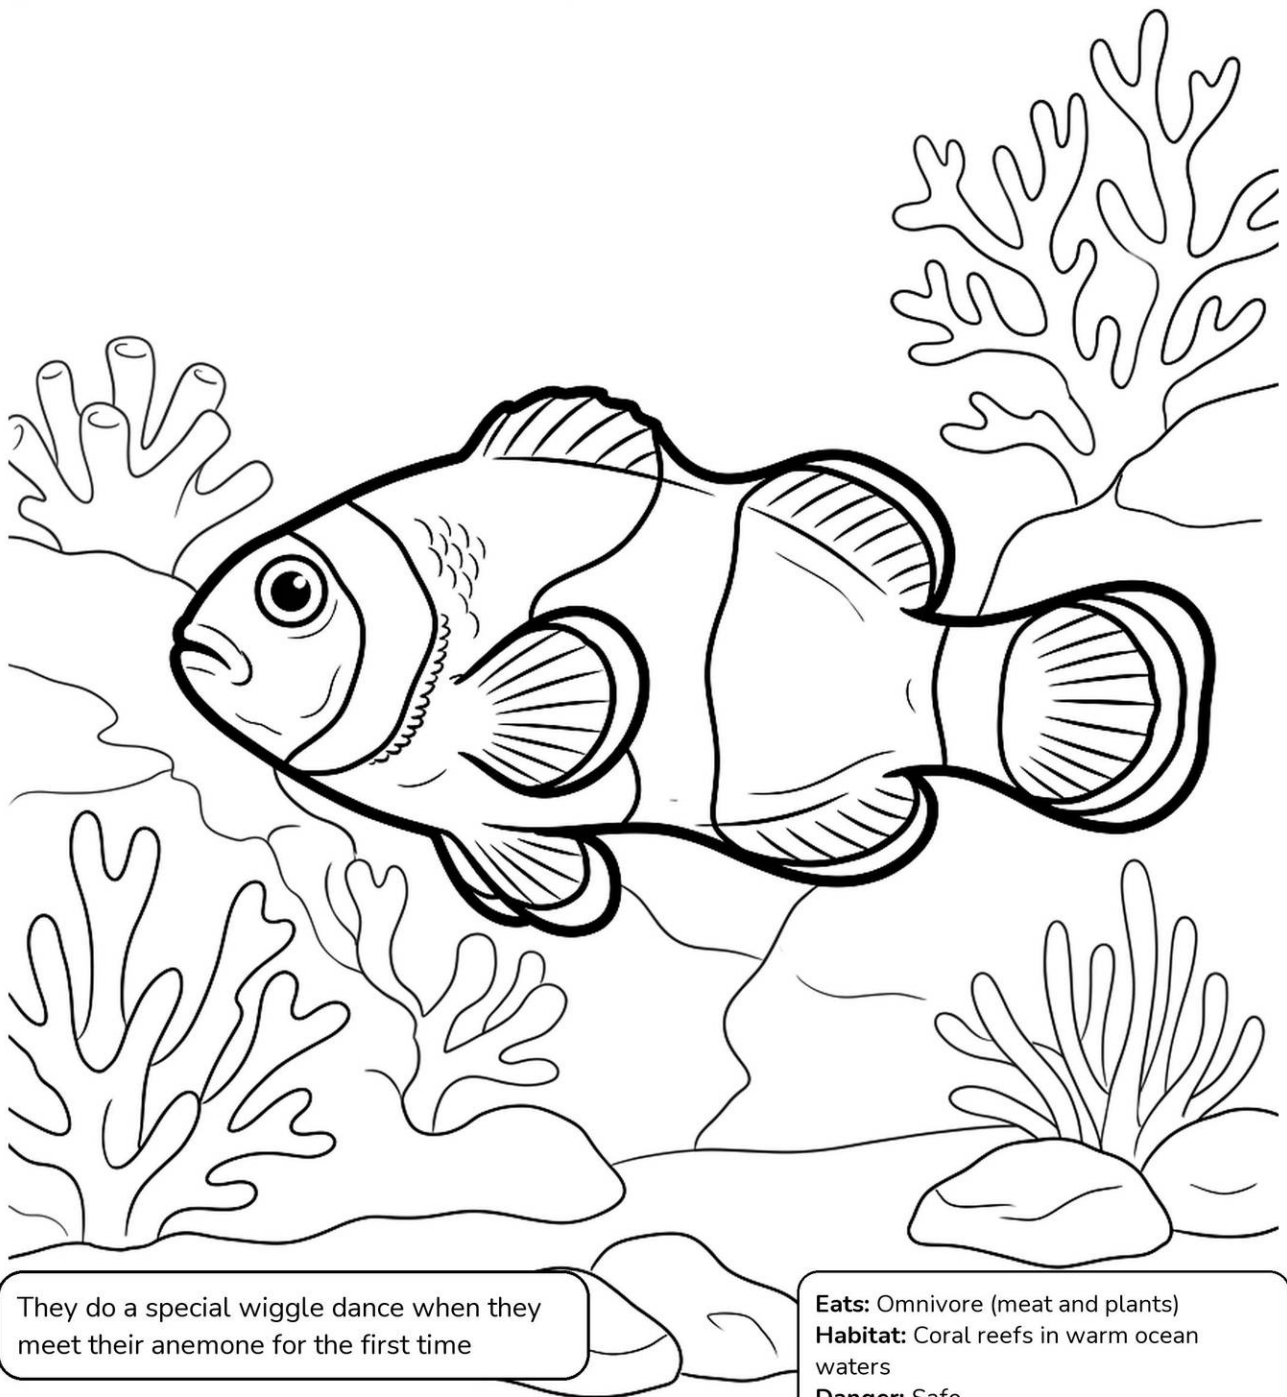

Clownfish

Riverbend Aquarium

Clownfish cover themselves in special mucus so anemone tentacles won't sting them

A clownfish dad protects hundreds of eggs until they hatch

They do a special wiggle dance when they meet their anemone for the first time

Eats: Omnivore (meat and plants)
Habitat: Coral reefs in warm ocean waters
Danger: Safe

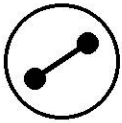

Clownfish

Indian Ocean and Pacific Ocean

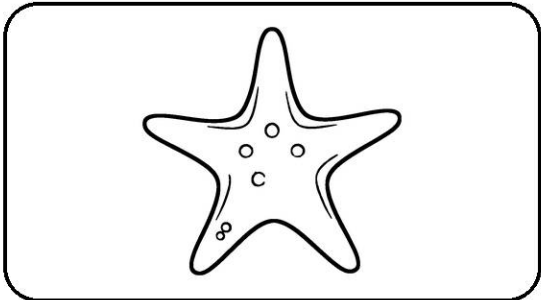

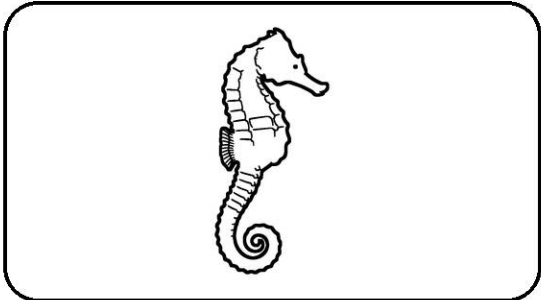

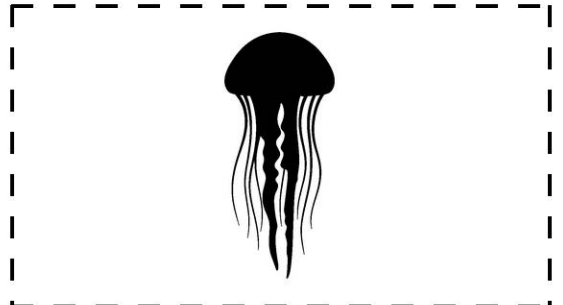

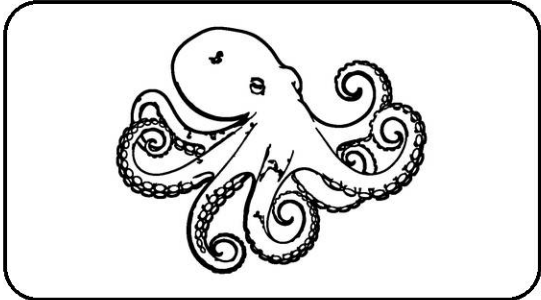

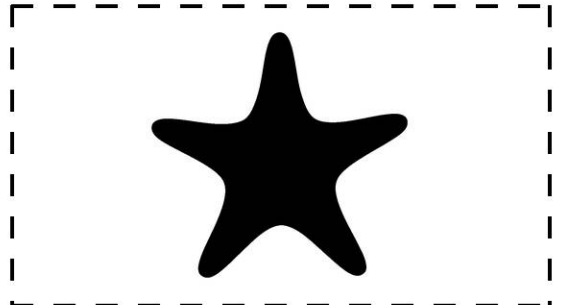

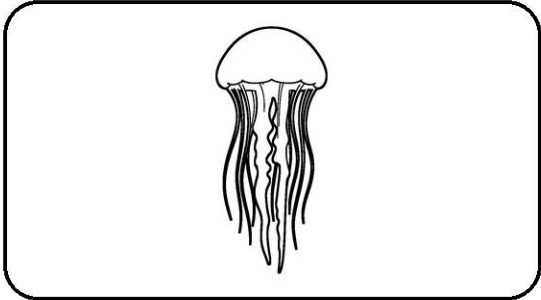

RIVERBEND
AQUARIUM

Shadow Match

Draw a line from each animal to its shadow.

Jellyfish

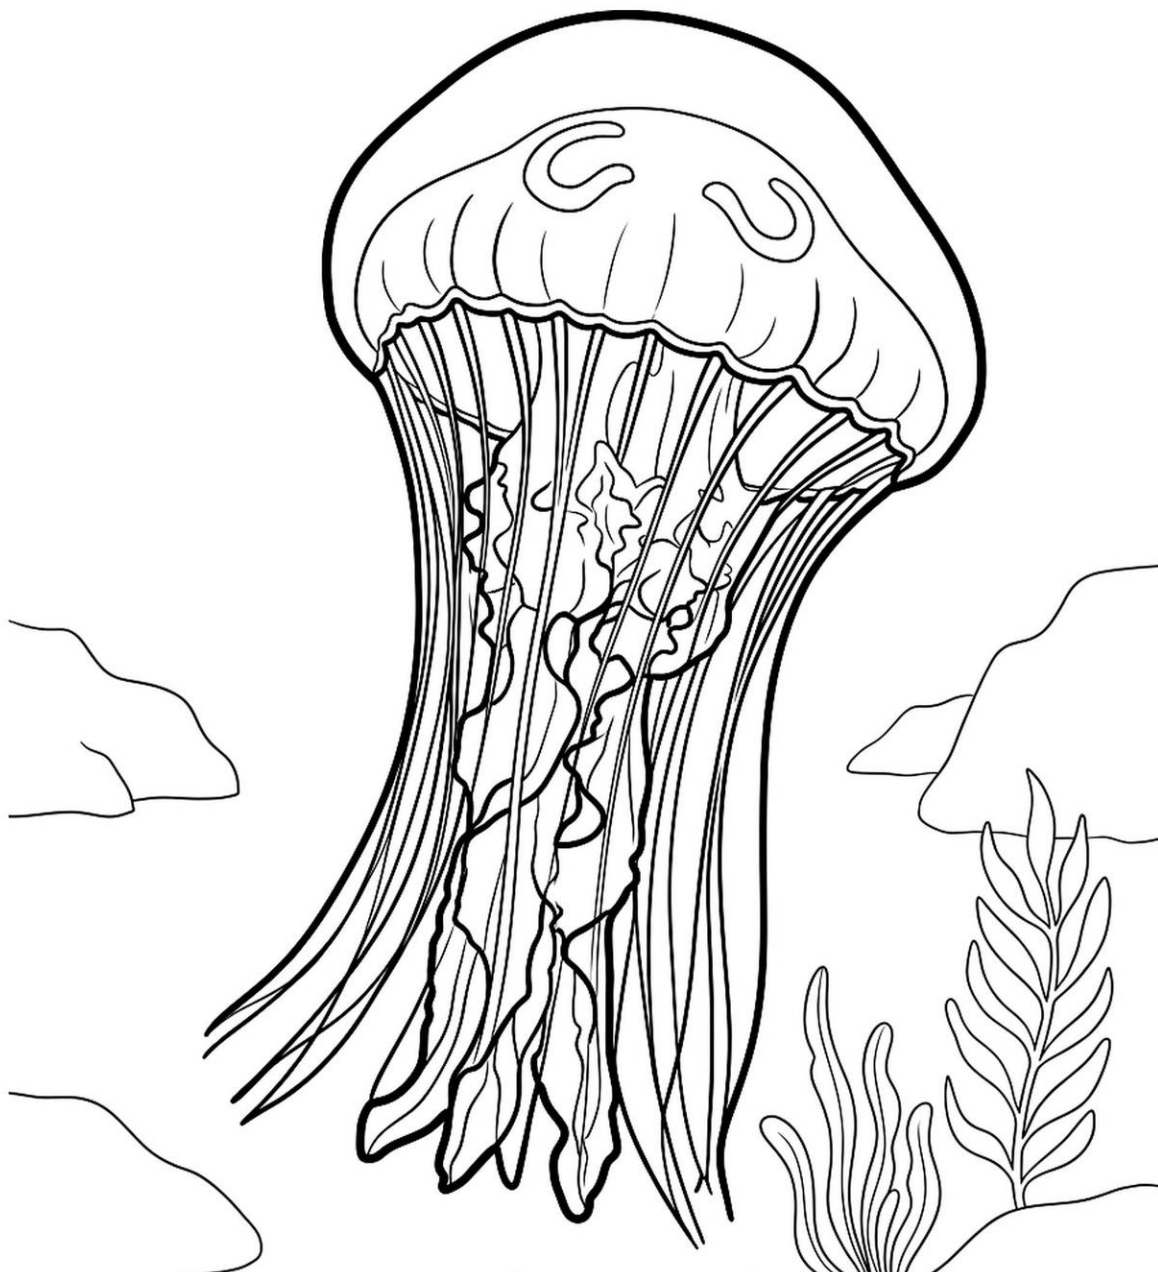

Riverbend Aquarium

RIVERBEND
AQUARIUM

Jellyfish are about 95% water, so they look almost see-through.

They catch food using special stinging cells on their tentacles.

They move by squeezing their bell-shaped body like a pump.

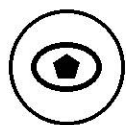

Eats: Carnivore (meat)
Habitat: Oceans worldwide
Danger: Dangerous

Jellyfish

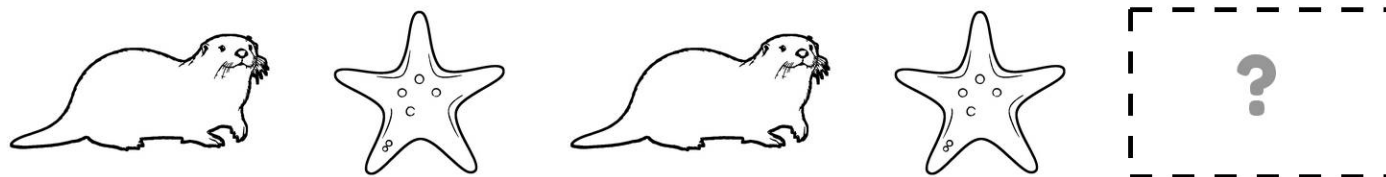

World's oceans

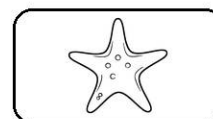

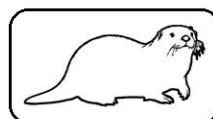

What Comes Next?

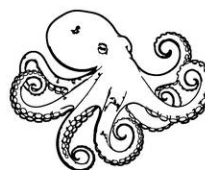

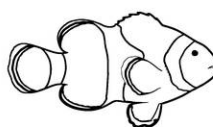

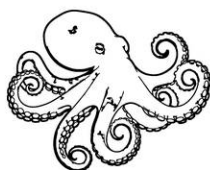

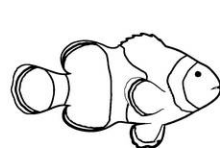

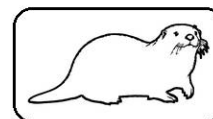

Look at the pattern. Circle the animal that comes next.

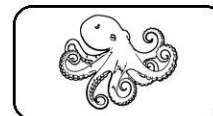

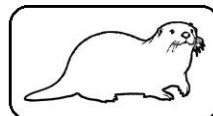

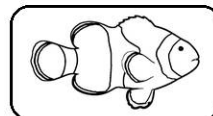

Circle one:

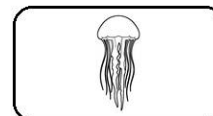

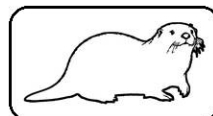

Circle one:

Circle one:

Circle one:

Sea Otter

Riverbend Aquarium

It floats on its back with its paws tucked up, bobbing along on top of the waves.

When the sea otter wants a snack, it balances a rock on its belly and taps a clam against it until it pops open.

It has the thickest, softest fur of any animal on Earth, with millions of tiny hairs keeping it warm in the cold sea.

Eats: Carnivore (meat)
Habitat: Coastal kelp forests and rocky shorelines
Danger: Safe

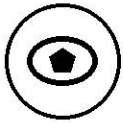

Sea Otter

On four continents

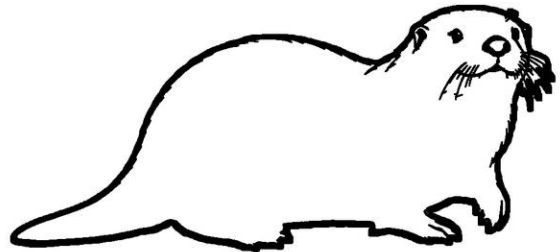

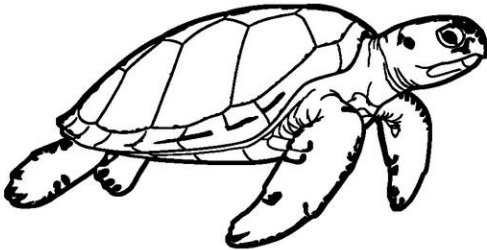

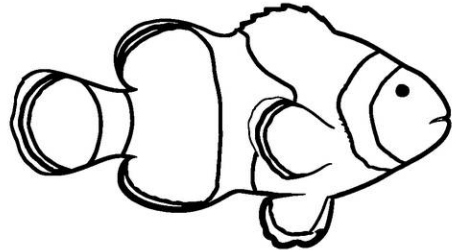

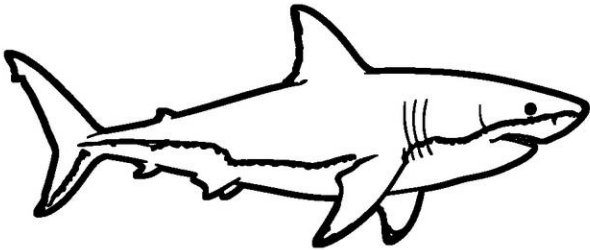

RIVERBEND
AQUARIUM

Friendly or Stay Away?

Circle the smiley face or the warning sign for each animal.

Stay away: Great White Shark, Jellyfish. The rest are friendly.

Great White Shark

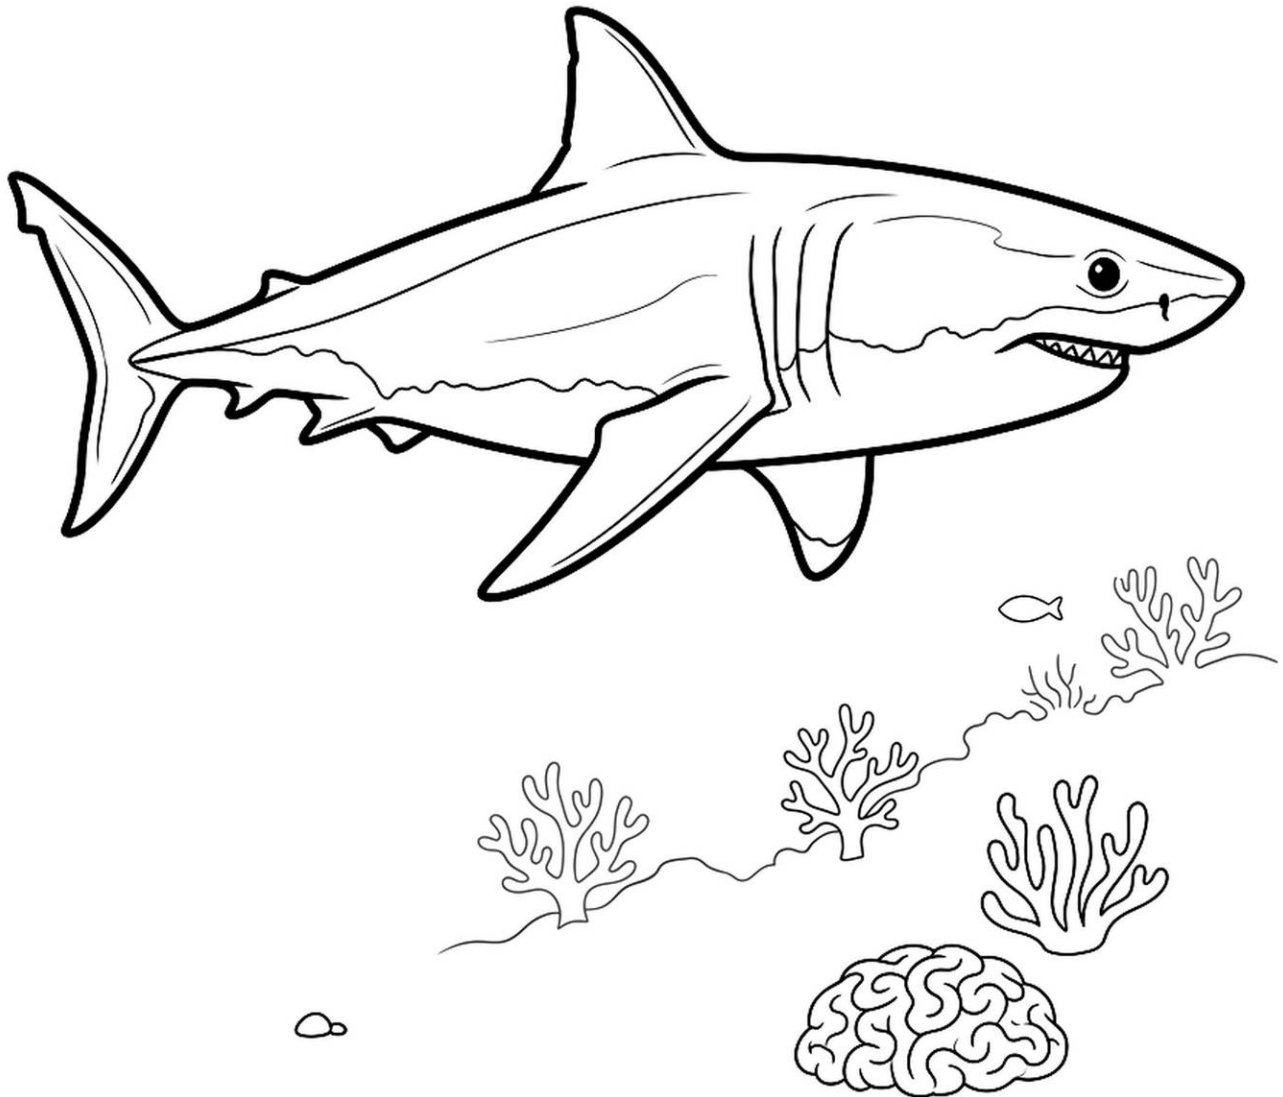

Some animals are safest from far away!

RIVERBEND
AQUARIUM

Great white sharks can grow as long as a minibus!

Their teeth are shaped like triangles with zigzag edges — perfect for cutting.

They can swim up to 56 kilometres per hour when they're chasing prey.

Eats: Carnivore (meat)
Habitat: Coastal and open ocean waters
Danger: Extremely Dangerous

Great White Shark

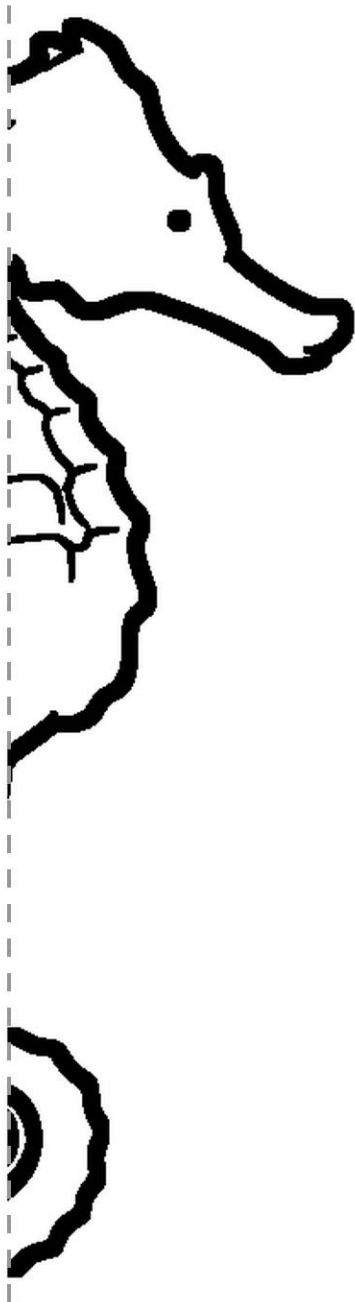

World's oceans

Finish Me!

Oh no! Part of me is missing. Draw my tail and my back fin.
Then color me in!

Seahorse

Riverbend Aquarium

Seahorses swim upright, not flat like other fish.

A seahorse can eat up to 3,000 tiny shrimp in one day.

Baby seahorses are called fry and are smaller than a grain of rice when they're born.

Eats: Carnivore (meat)
Habitat: Shallow coastal waters with seagrass and coral
Danger: Safe

Seahorse

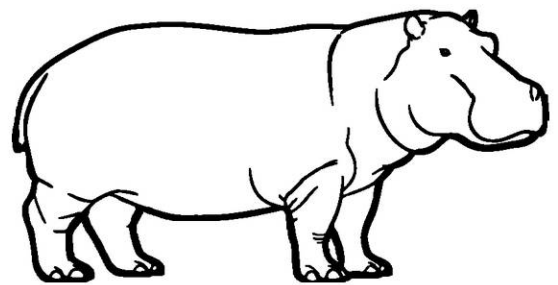

Worldwide

Draw My Home

I live in rivers and lakes in Africa. Draw my home: add water and reeds!

Hippopotamus

Riverbend Aquarium

Hippos spend most of their day in the water to keep their skin cool and moist.

At night, hippos leave the water to eat grass — they can eat 80 pounds in one night!

A hippo's eyes, ears, and nose are all on top of its head so it can see and breathe while mostly underwater.

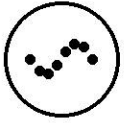

Eats: Herbivore (plants)
Habitat: Rivers and lakes
Danger: Extremely Dangerous

Hippopotamus

Africa

Trace & Write

Trace my name. Then write it by yourself!

Manta

Manta

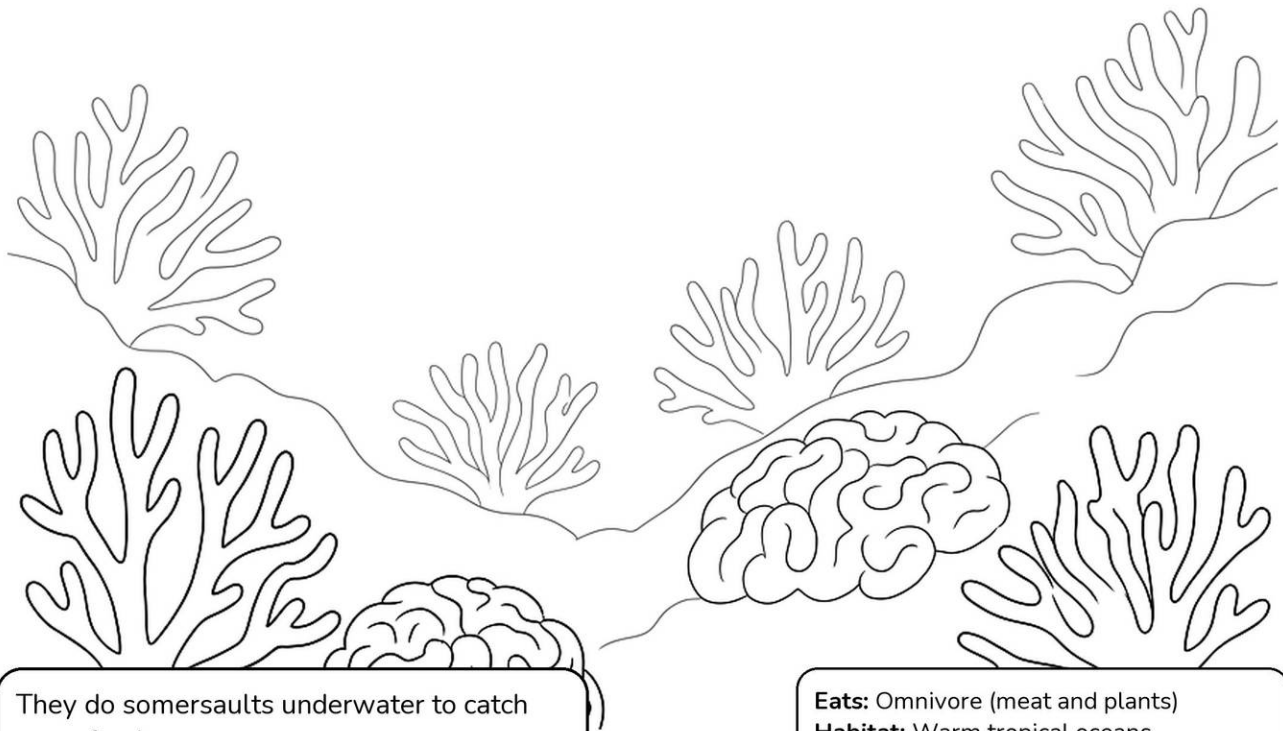

Manta Ray

Riverbend Aquarium

Manta rays can grow as wide as a small car.

They eat tiny floating animals called plankton by filtering water through their mouths.

They do somersaults underwater to catch more food.

Eats: Omnivore (meat and plants)
Habitat: Warm tropical oceans
Danger: Safe

Manta Ray

World's oceans

AQUARIUM

Spot the Difference

Find 5 things missing in the bottom picture. Circle them!

○ ○ ○ ○ ○

Sea Lion

Riverbend Aquarium

Sea lions can rotate their back flippers forward to walk on land like a four-legged animal.

They have ear flaps on the outside of their heads — seals have ears but no flaps you can see.

A sea lion's whiskers are so sensitive they can feel a fish swimming by in complete darkness.

Eats: Carnivore (meat)
Habitat: Rocky coastlines and beaches
Danger: Low Risk

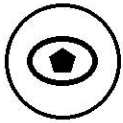

Sea Lion

Pacific Ocean and Southern Ocean

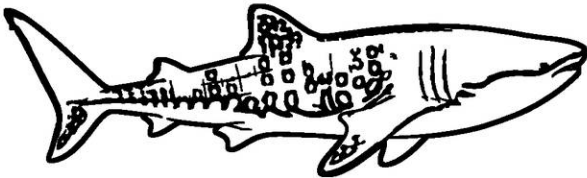

RIVERBEND
AQUARIUM

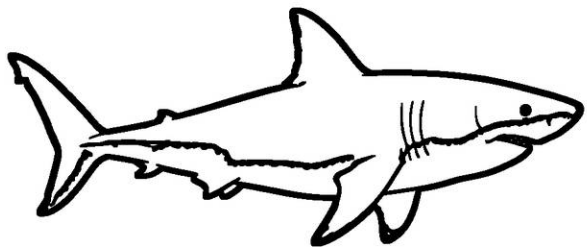

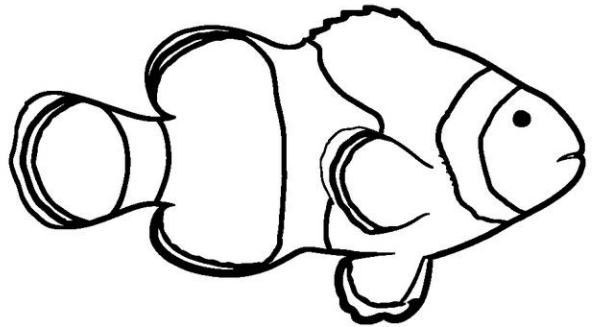

Big or Small?

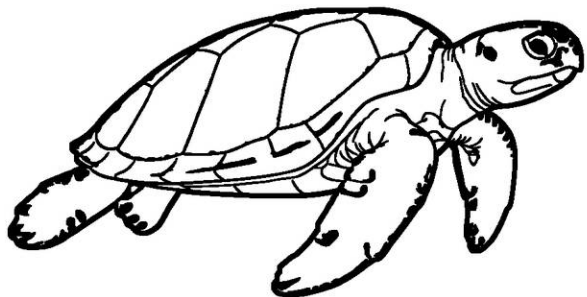

Circle the BIGGER animal in each box.

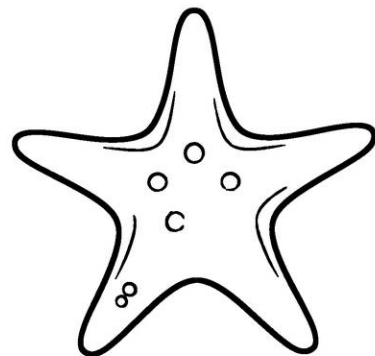

or

or

or

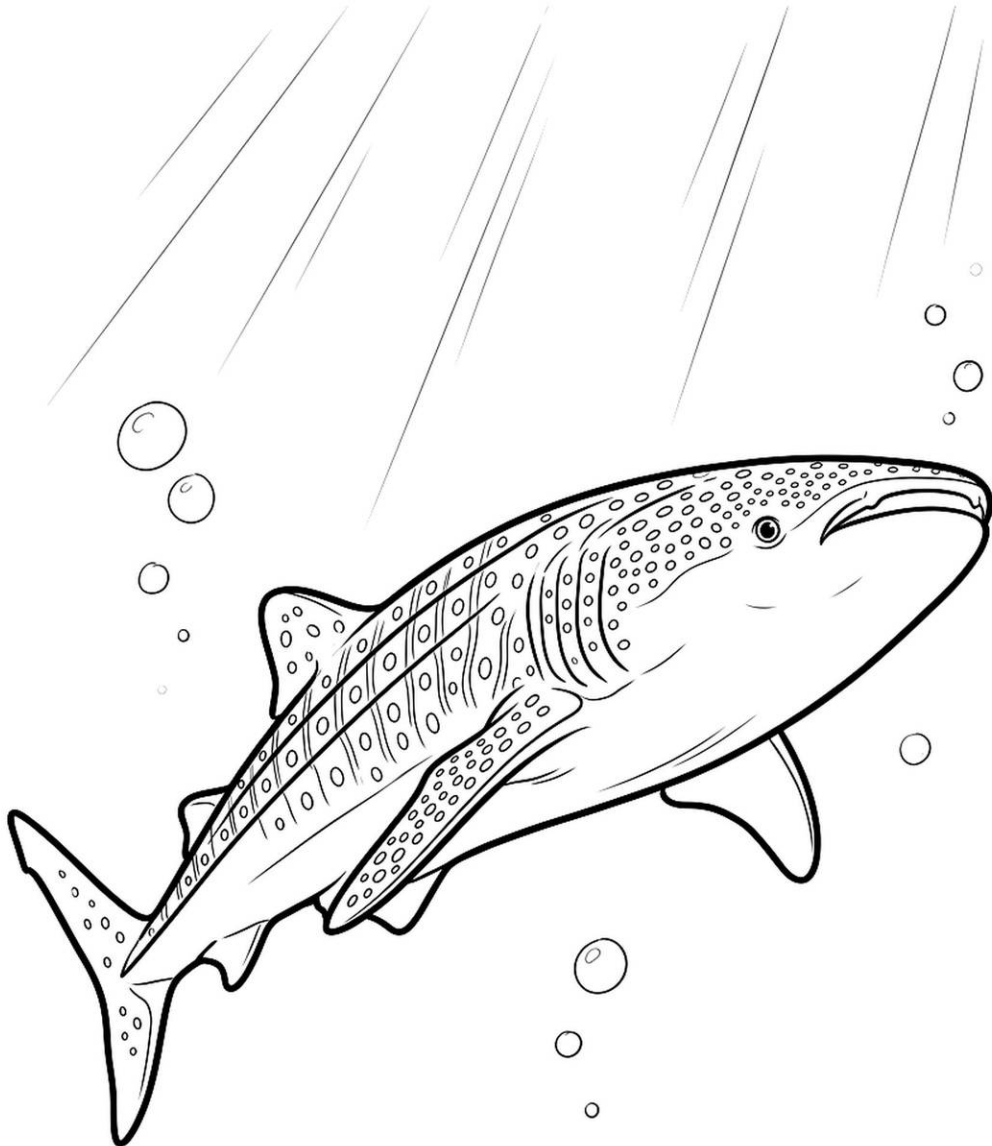

Whale Shark

Real sizes from the Wild Atlas app

Whale sharks have about 3,000 tiny teeth, but they don't use them to eat.

A whale shark's mouth can be 1.5 metres wide — big enough for a person to stand in.

They are gentle giants that sometimes let divers swim beside them.

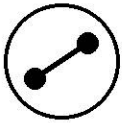

Eats: Omnivore (meat and plants)
Habitat: Warm tropical oceans
Danger: Safe

Whale Shark

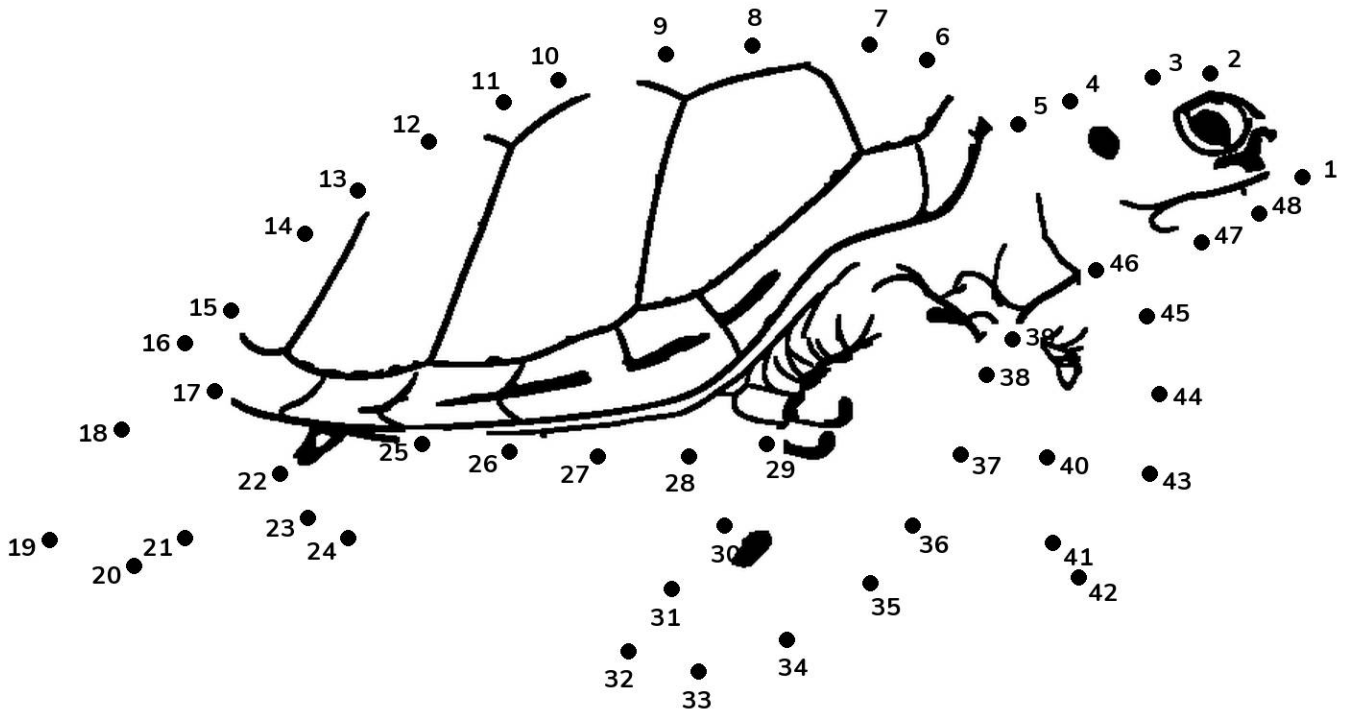

World's oceans

Dot-to-Dot

Connect the dots from 1 to the end. Then color me in!

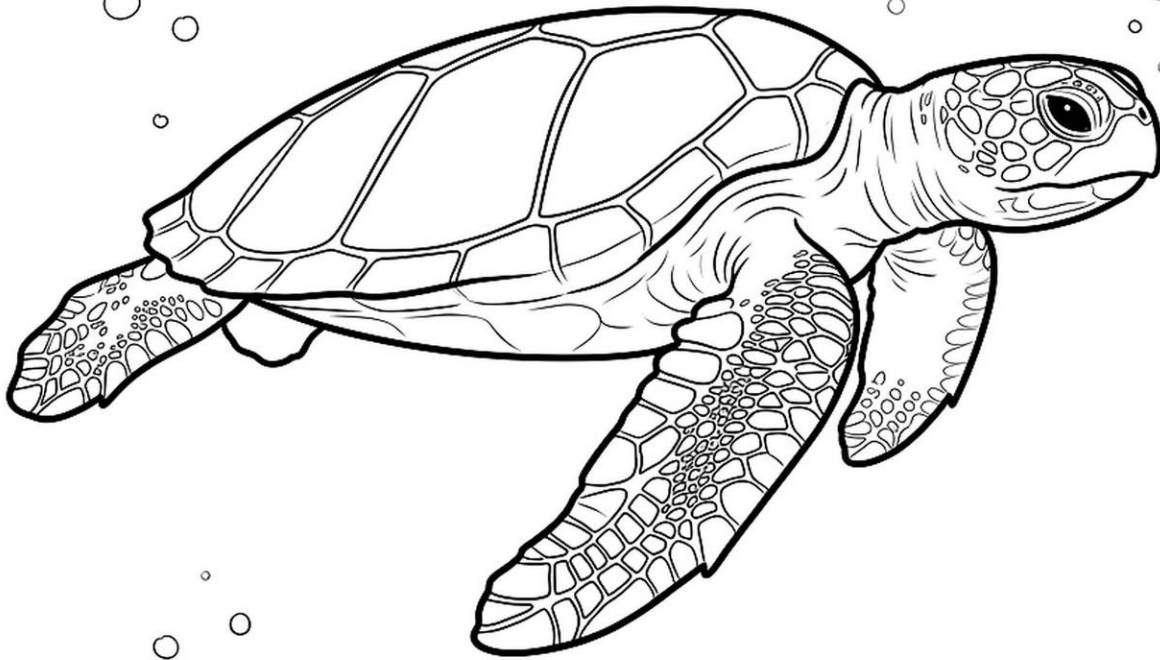

Sea Turtle

Riverbend Aquarium

Baby sea turtles hatch at night and race to the ocean guided by moonlight on the waves.

Leatherback sea turtles can dive deeper than 1,200 metres — that's as deep as four Eiffel Towers stacked on top of each other.

Sea turtles can't pull their heads and flippers into their shells like land turtles can.

Eats: Omnivore (meat and plants)
Habitat: Warm tropical oceans and sandy beaches
Danger: Safe

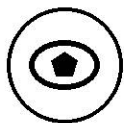

Sea Turtle

World's oceans

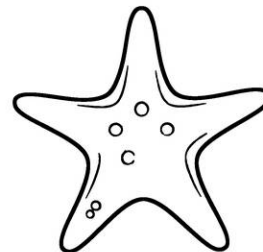

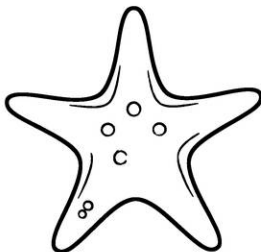

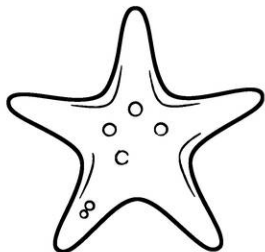

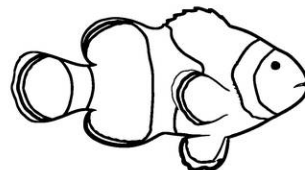

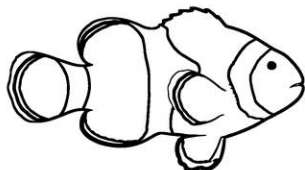

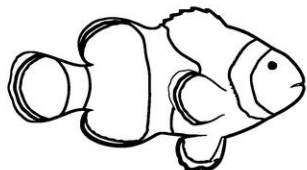

RIVERBEND
AQUARIUM

Odd One Out

Circle the one that is different in each row.

Answers: row 1: #4, row 2: #3, row 3: #3, row 4: #2

Moray Eel

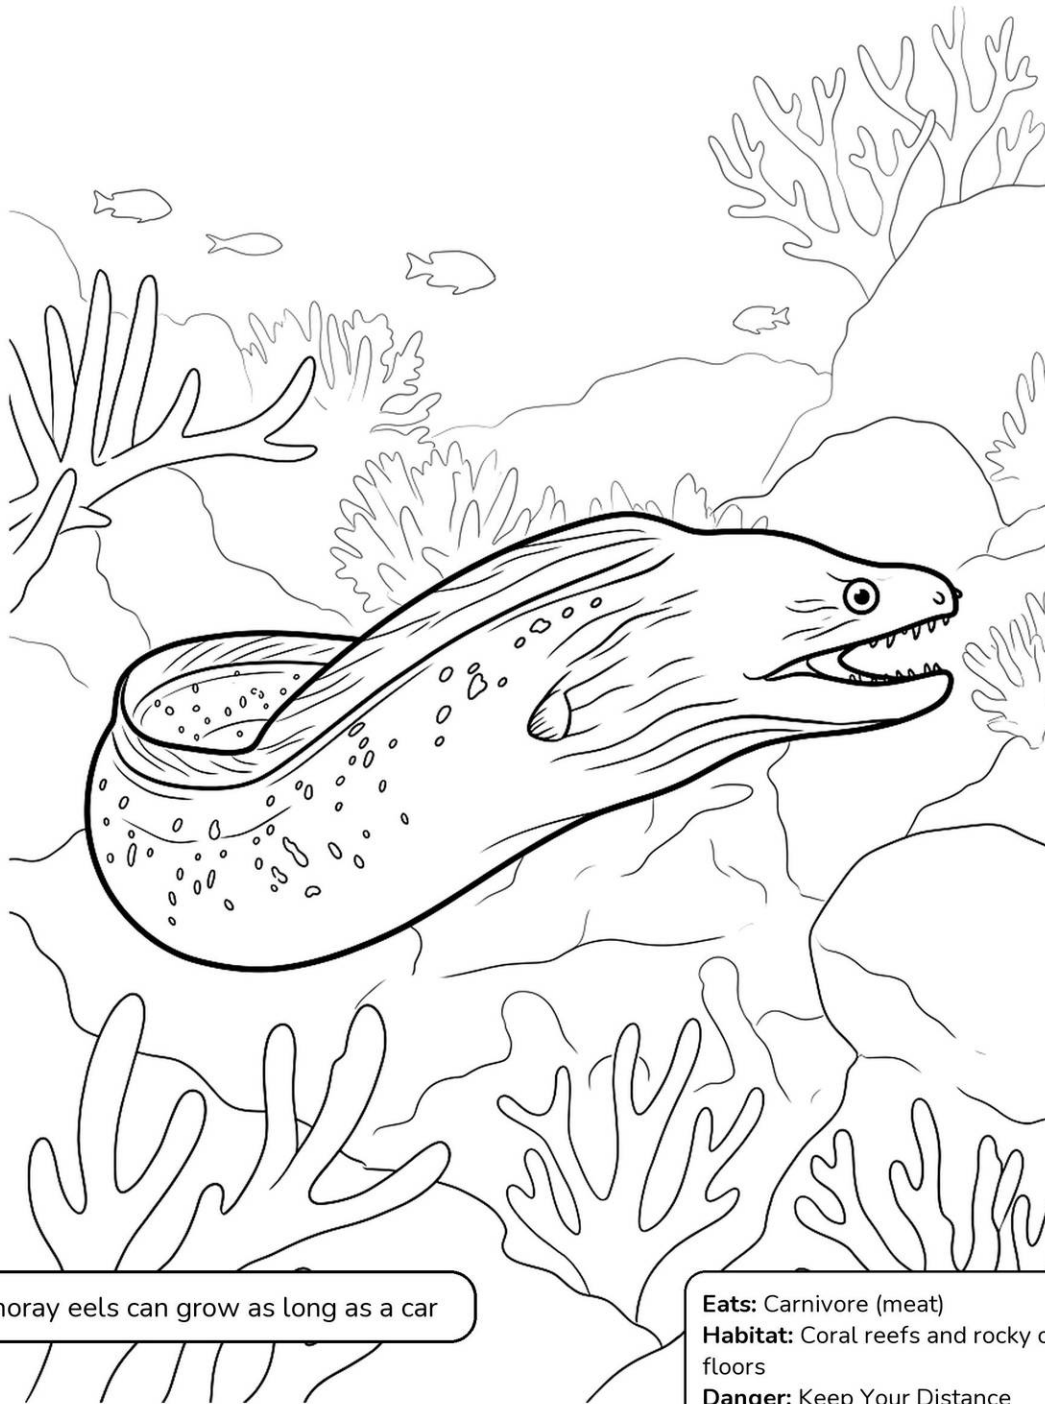

Row 4 is tricky — look closely!

RIVERBEND
AQUARIUM

Moray eels sleep during the day with their mouths open to breathe

They have terrible eyesight and hunt mostly by smell

Some moray eels can grow as long as a car

Eats: Carnivore (meat)
Habitat: Coral reefs and rocky ocean floors
Danger: Keep Your Distance

Moray Eel

World's oceans

Answers: Puffin, Octopus, Otter, Clownfish, Starfish

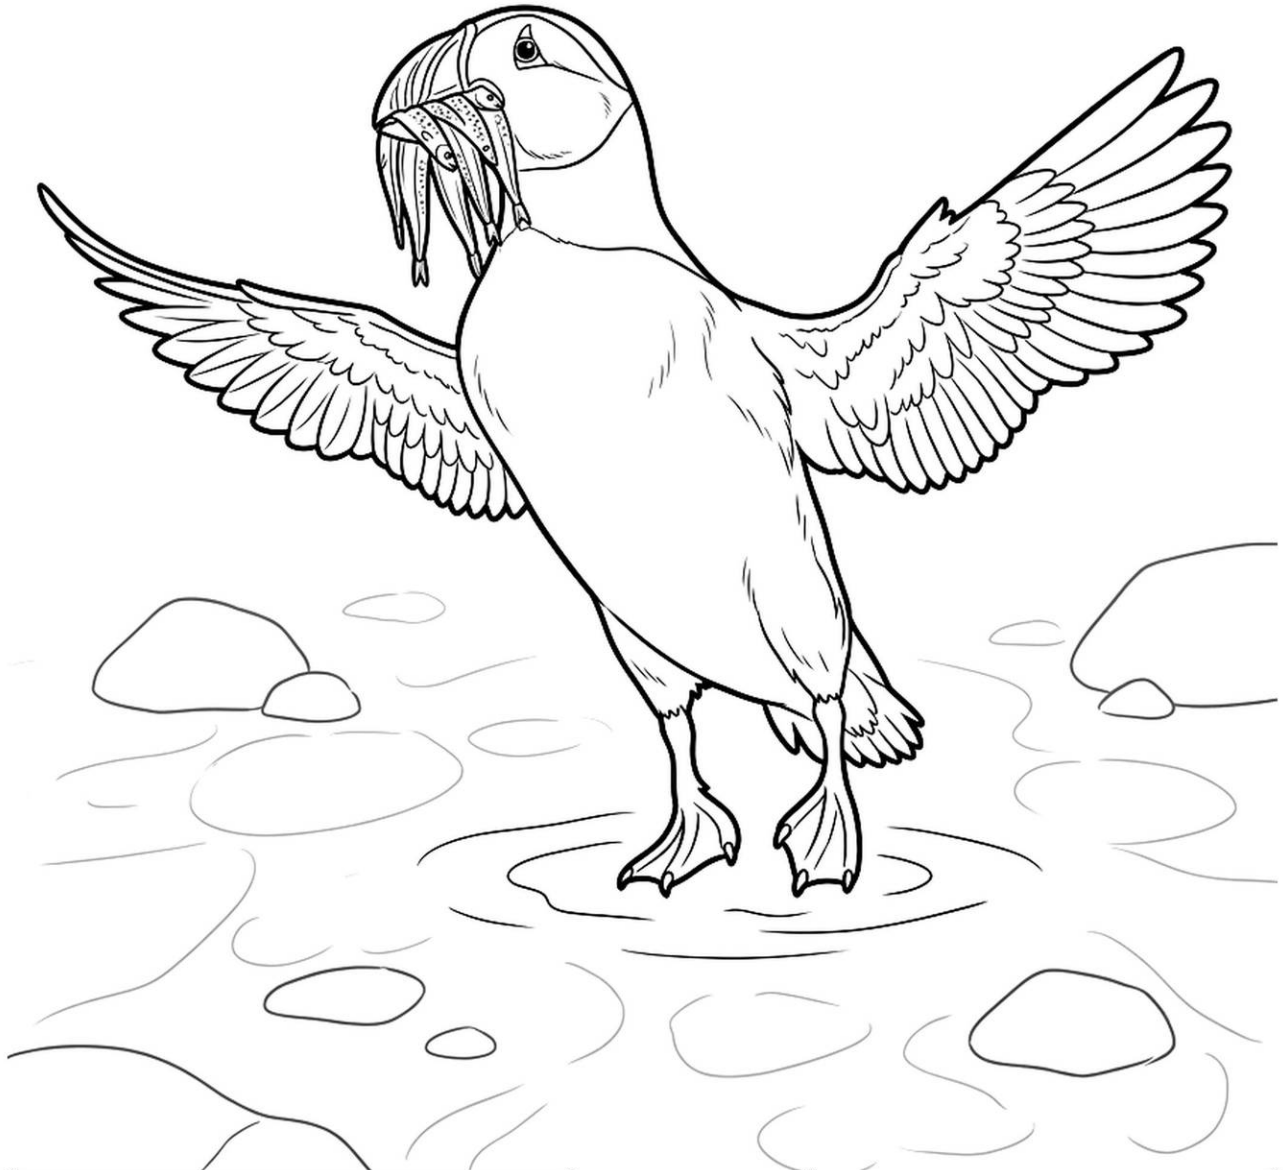

Atlantic Puffin

Riverbend Aquarium

Baby puffins are called pufflings and they're covered in fluffy gray feathers.

Puffins spend most of their life at sea and only come to land to have babies.

They can swim underwater using their wings like flippers.

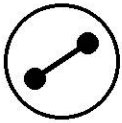

Eats: Carnivore (meat)
Habitat: Rocky islands and cliffs
Danger: Safe

Atlantic Puffin

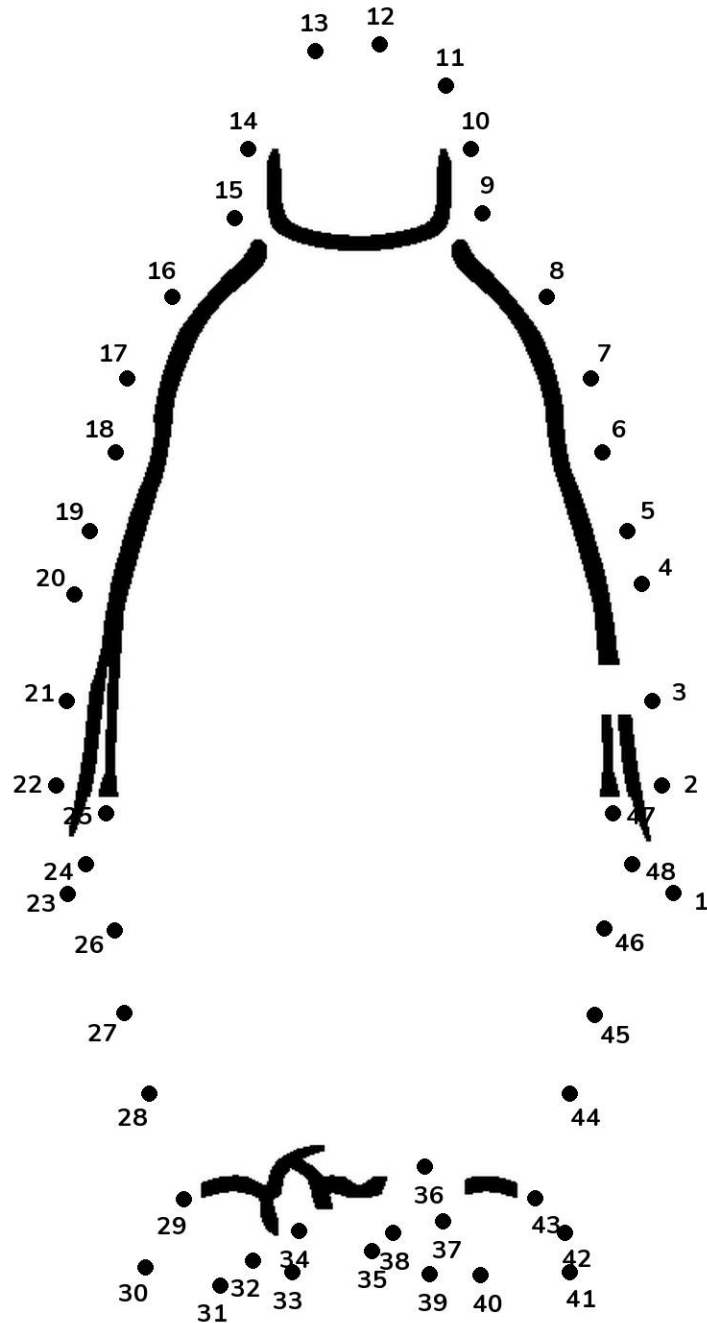

North Atlantic Ocean

Dot-to-Dot

Connect the dots from 1 to the end. Then color me in!

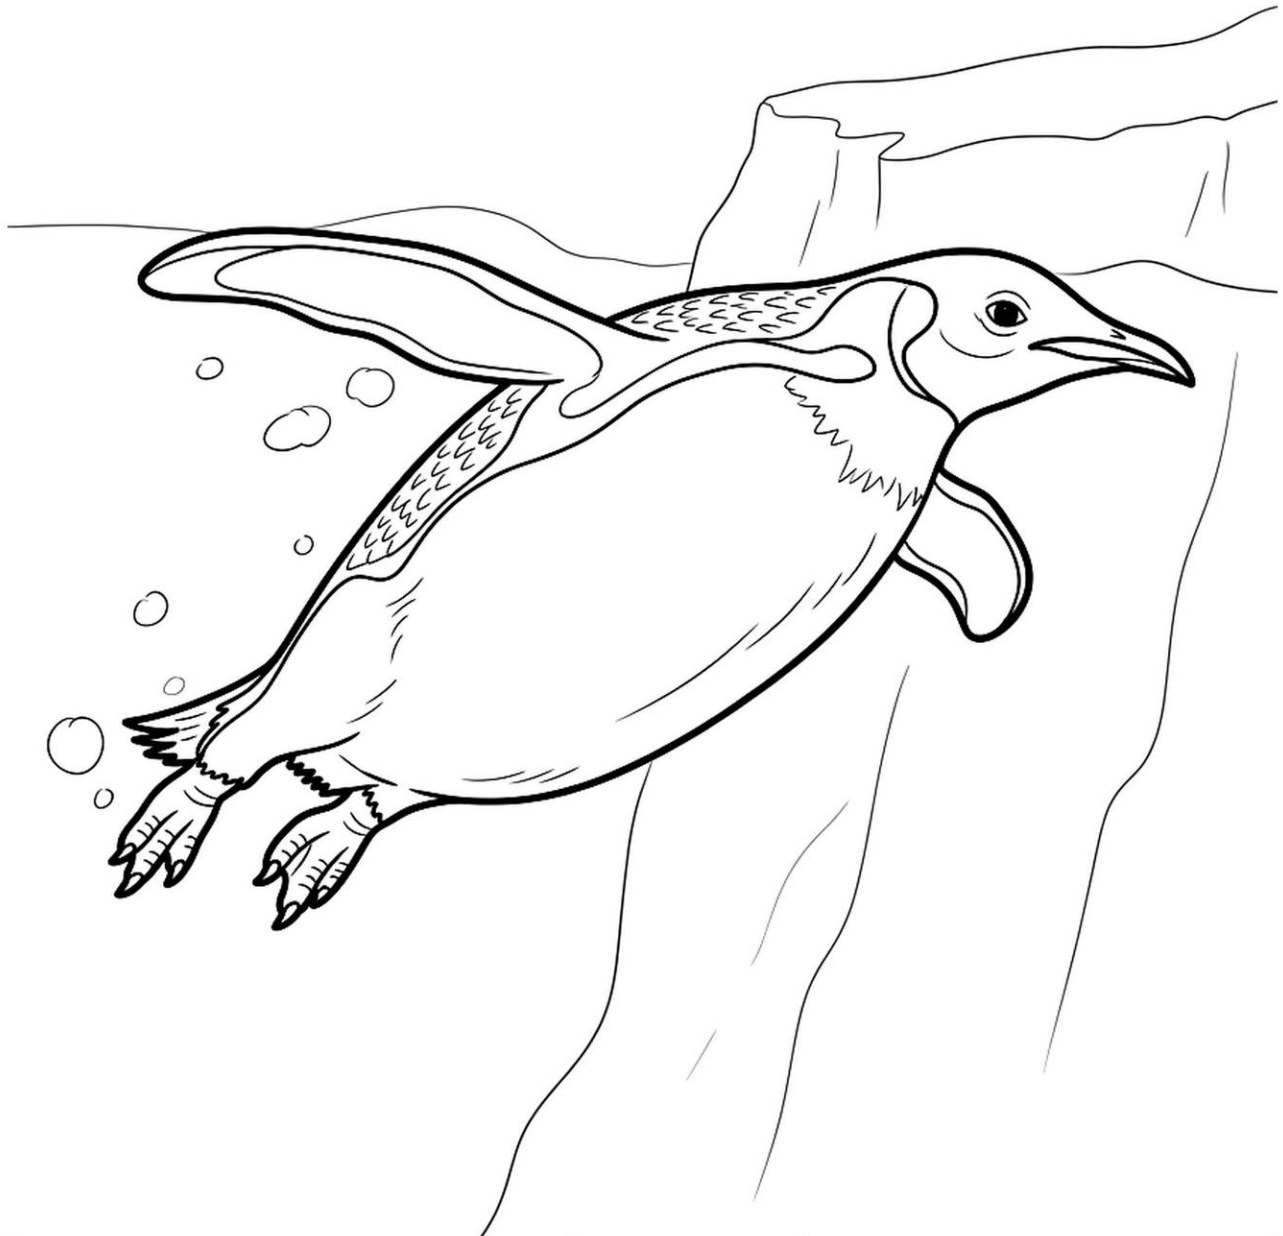

Emperor Penguin

Riverbend Aquarium

Emperor penguins toboggan on their bellies across the ice to move faster.

Their black and white coloring helps them hide from predators — white belly from below, black back from above.

Baby emperors can't swim until they lose their fluffy baby feathers and grow waterproof adult feathers.

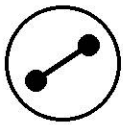

Eats: Carnivore (meat)
Habitat: Antarctic ice and ocean
Danger: Safe

Emperor Penguin

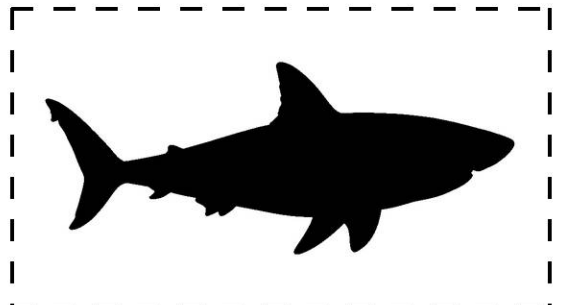

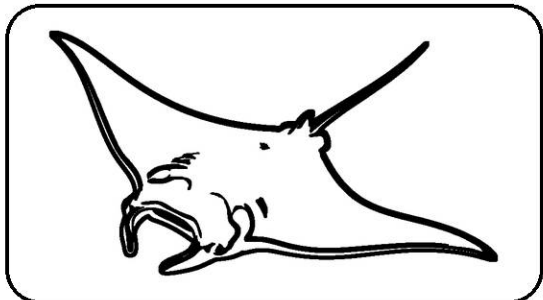

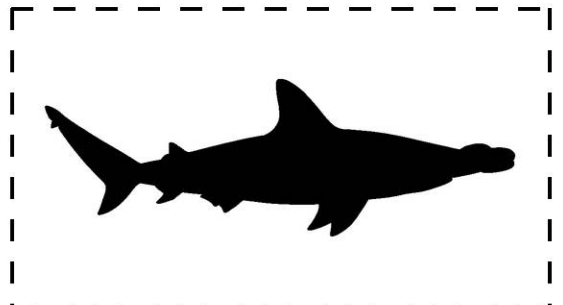

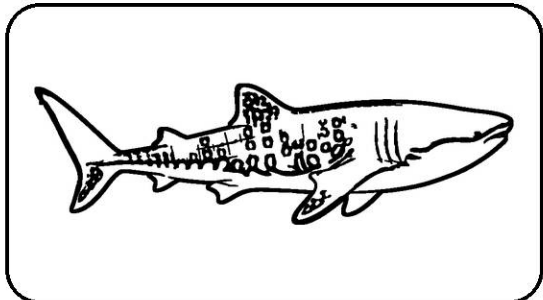

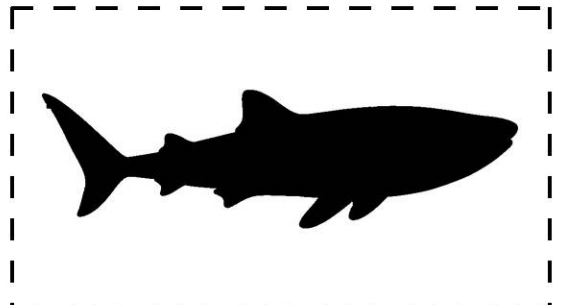

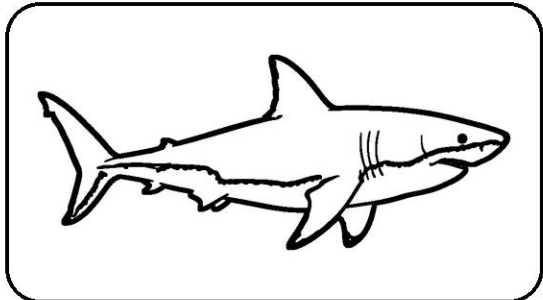

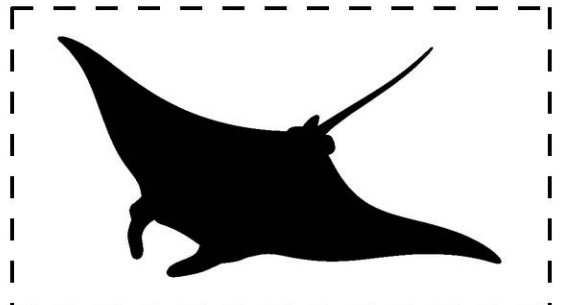

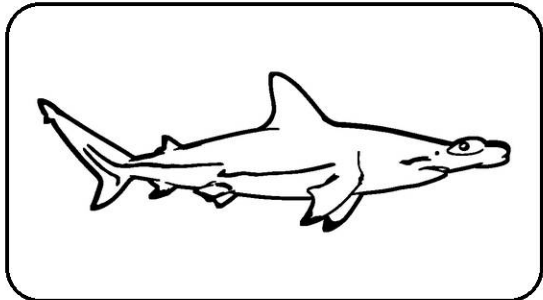

Antarctica

Shadow Match

Draw a line from each animal to its shadow.

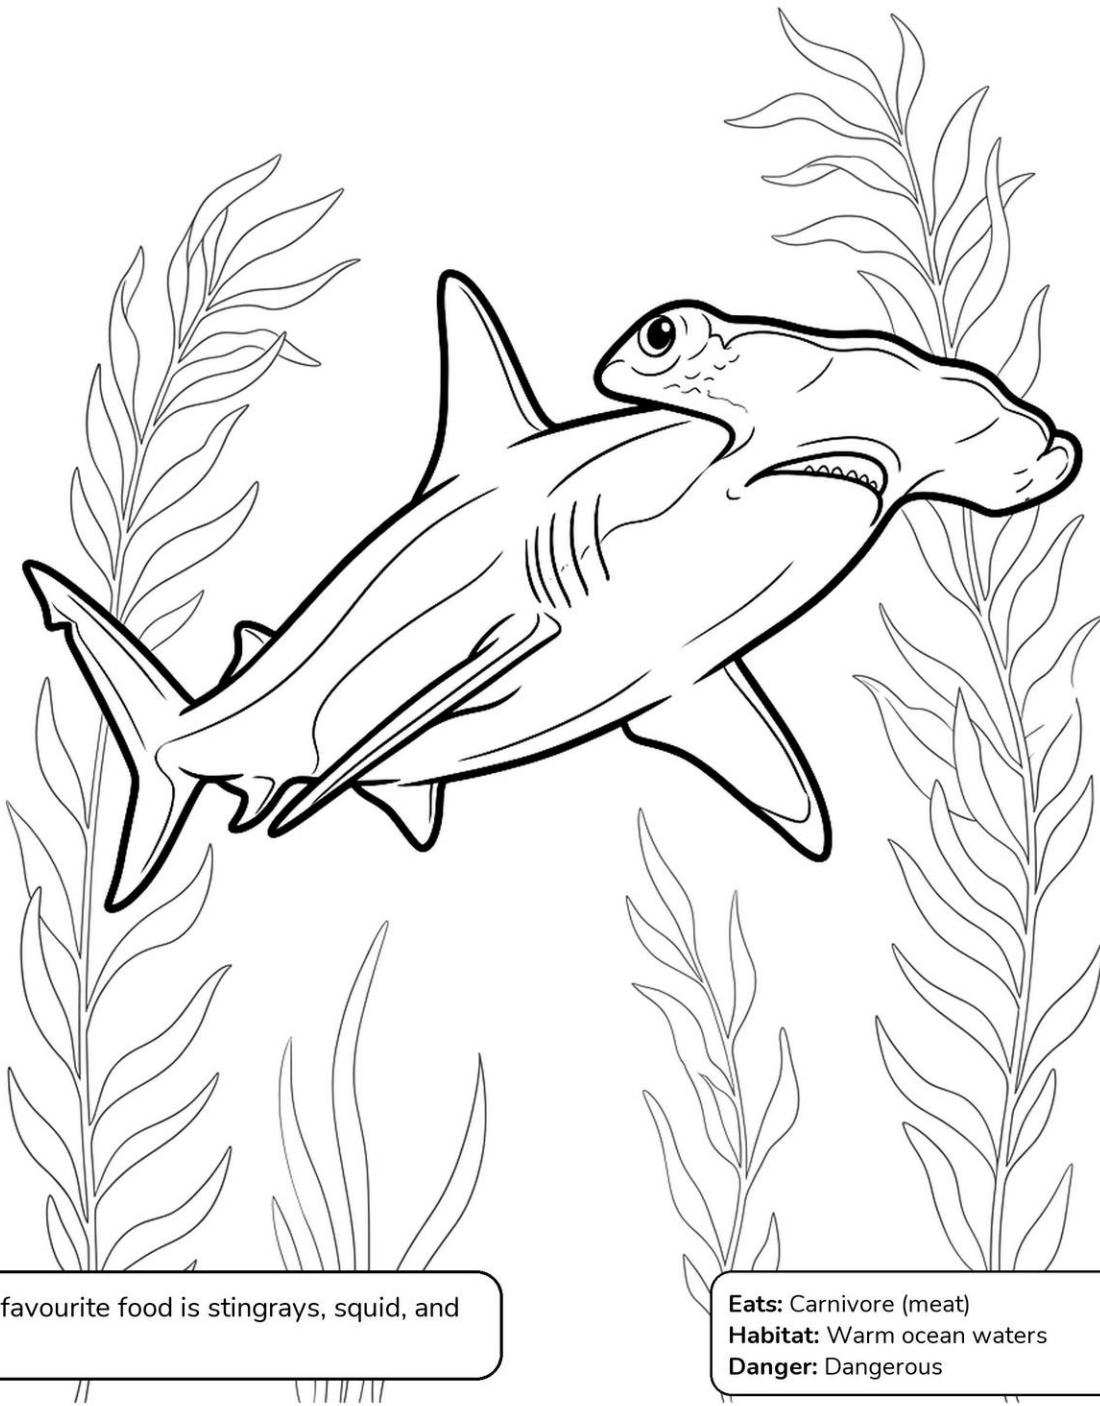

Hammerhead Shark

Riverbend Aquarium

Baby hammerheads are born with soft, bendy heads that harden as they grow

Hammerheads love to eat stingrays, even though stingrays have poisonous barbs

Their favourite food is stingrays, squid, and fish

Eats: Carnivore (meat)
Habitat: Warm ocean waters
Danger: Dangerous

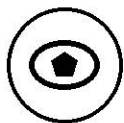

Hammerhead Shark

World's oceans

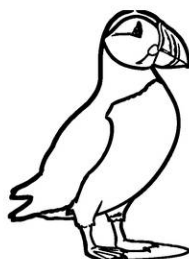

RIVERBEND
AQUARIUM

Odd One Out

Circle the one that is different in each row.

Answers: row 1: #3, row 2: #2, row 3: #4, row 4: #1

Axolotl

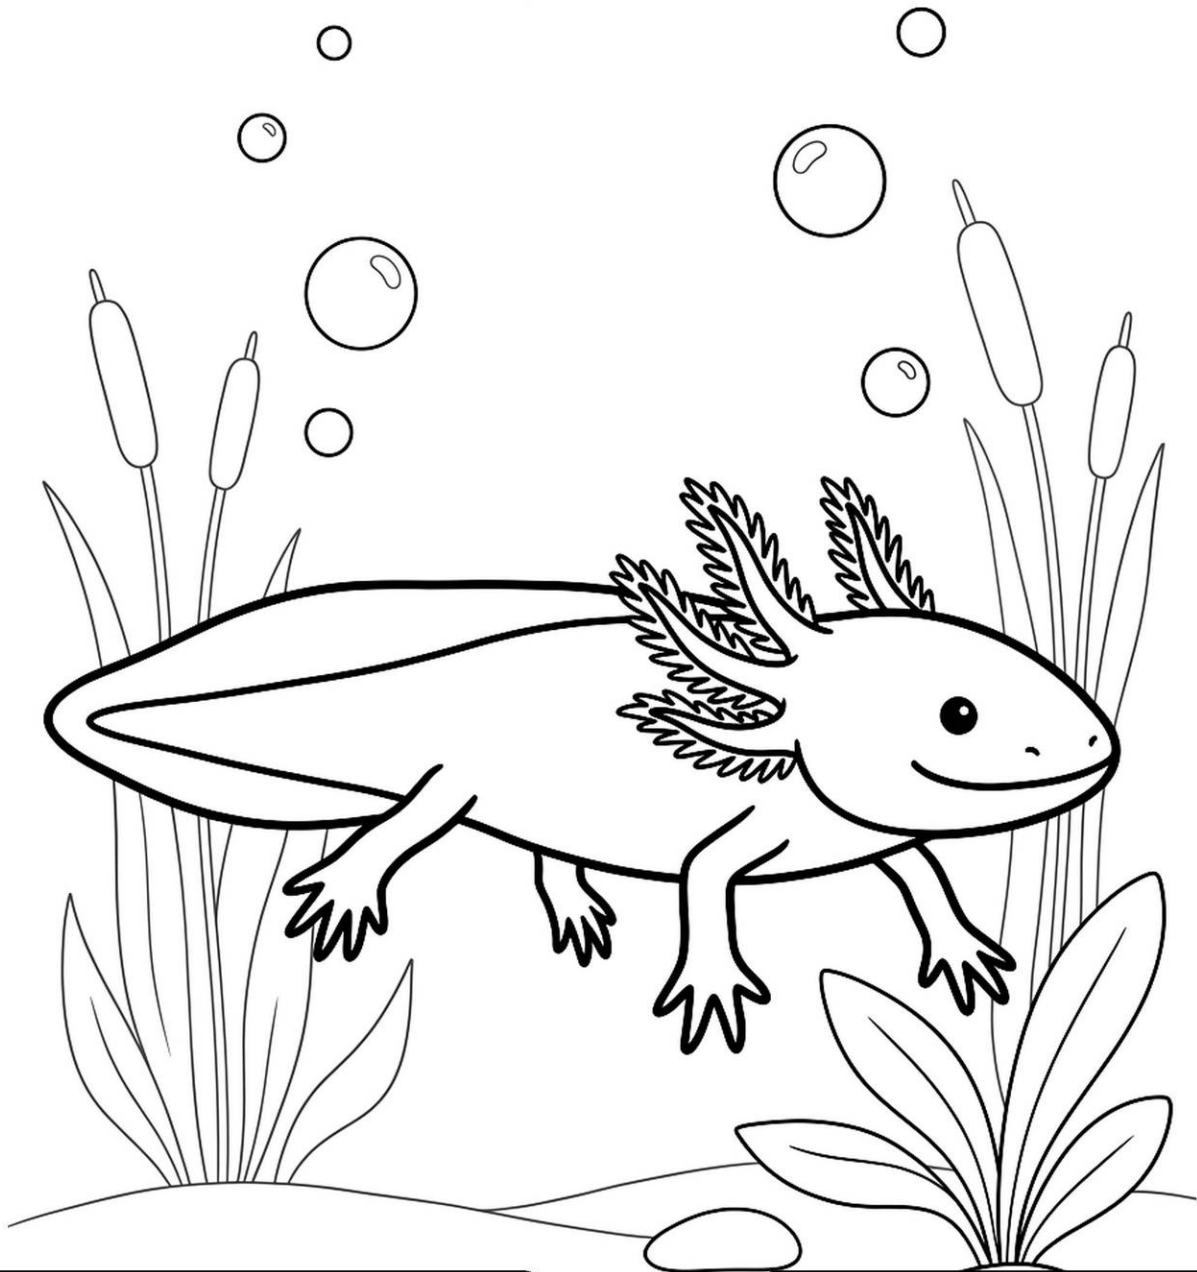

Row 4 is tricky — look closely!

RIVERBEND
AQUARIUM

Those feathery pink branches around its head are gills, and that's how it breathes underwater.

If it loses a leg, a tail, or even a piece of its heart, it can grow a perfect new one.

It keeps its baby shape and lives in the water its whole life, never crawling onto land.

Eats: Carnivore (meat)
Habitat: Freshwater lakes and canals
Danger: Safe

Axolotl

Mexico

RIVERBEND
AQUARIUM

Draw My Home

I live in rivers and swamps. Draw my home: add water, reeds and maybe a fish!

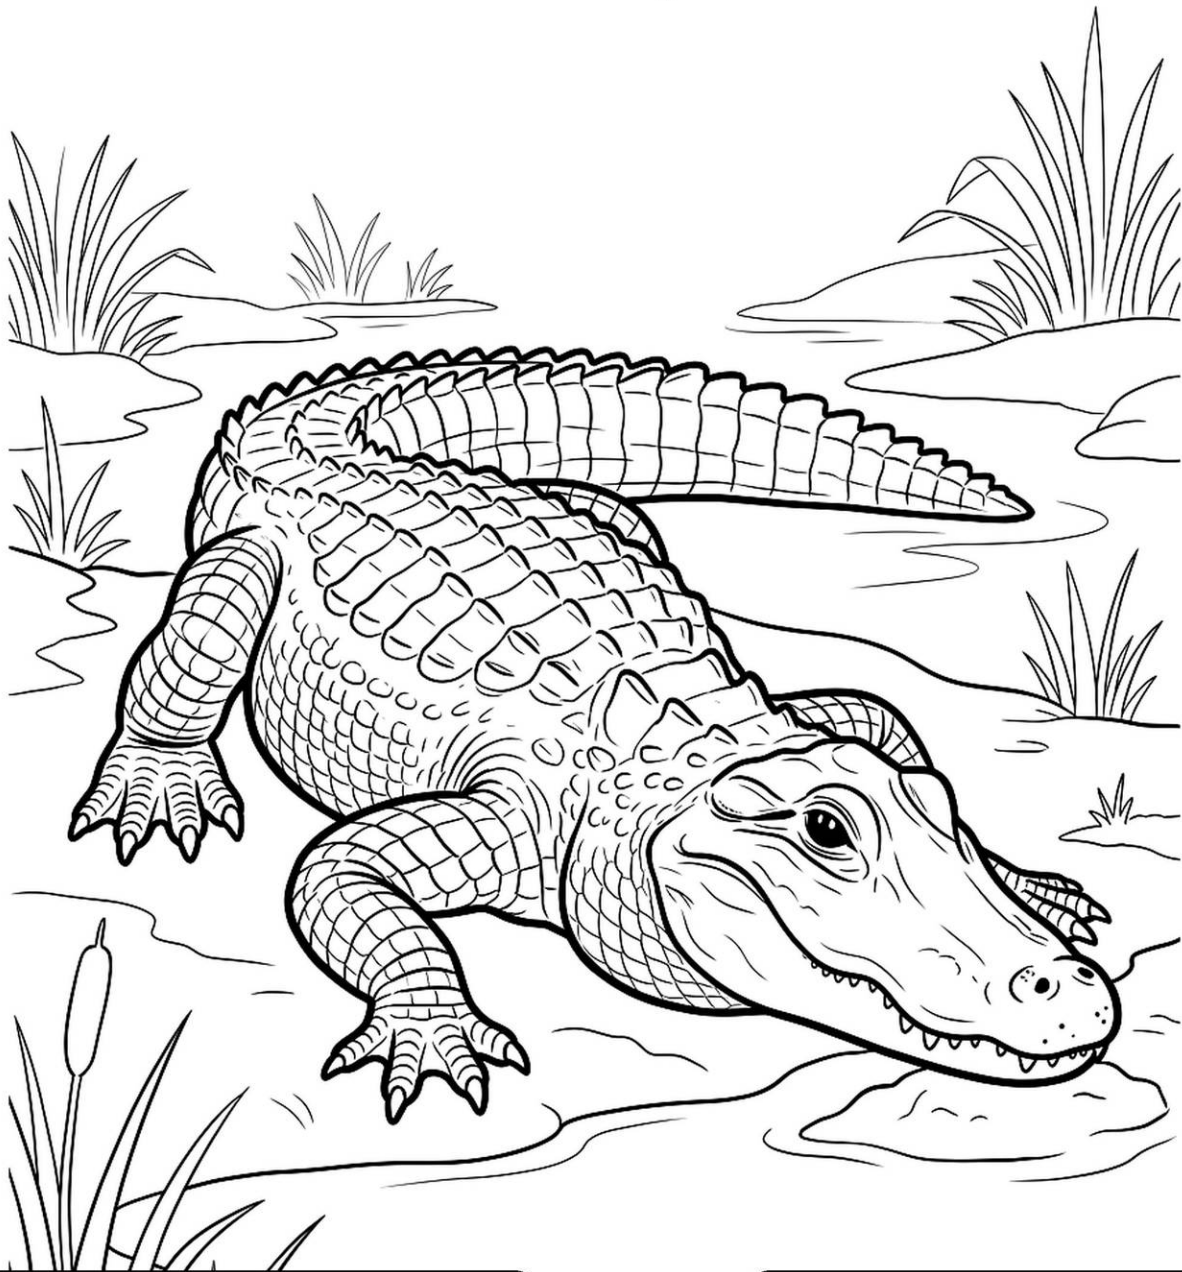

Alligator

Riverbend Aquarium

Alligators can't chew their food — they swallow it whole or tear it into chunks!

An alligator has about 80 teeth, and when one falls out, a new tooth grows back in its place.

They dig underwater dens called 'gator holes' that help other animals survive during droughts.

Eats: Carnivore (meat)
Habitat: Freshwater swamps, marshes, rivers, and lakes
Danger: Extremely Dangerous

Alligator

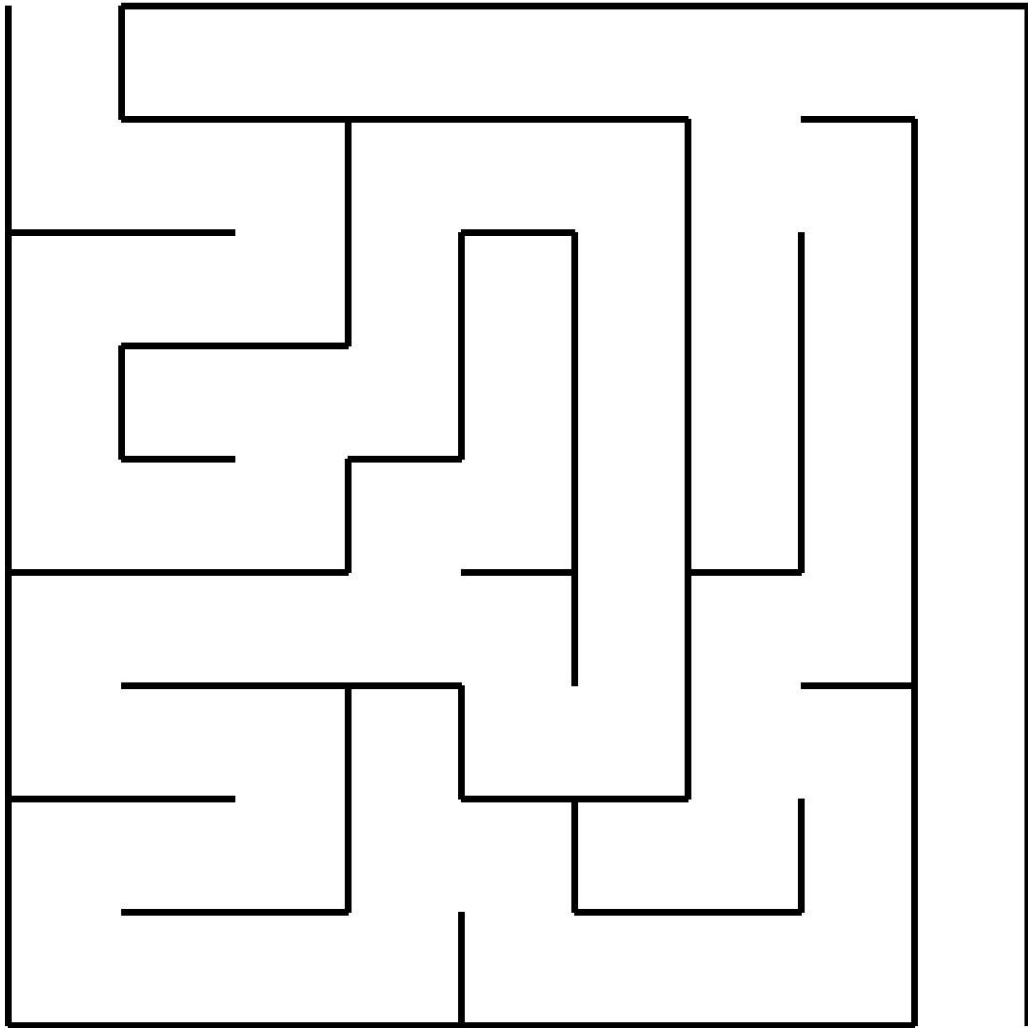

North America and China

Amazing Maze

Help the little platypus find its mom!

Platypus

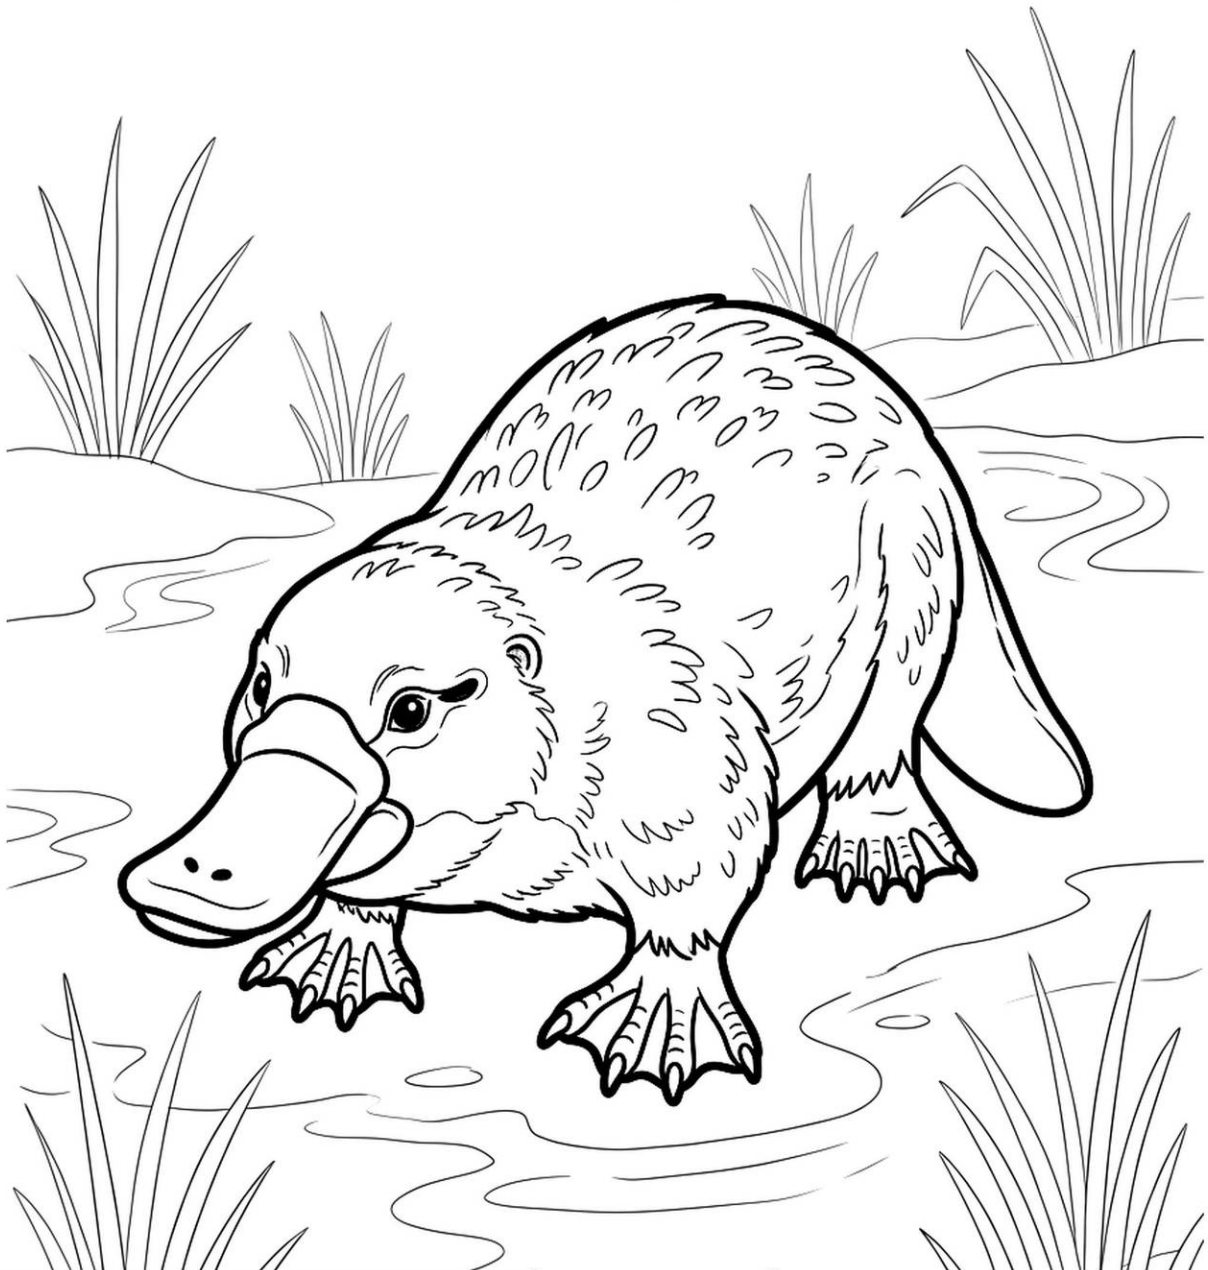

Riverbend Aquarium

RIVERBEND
AQUARIUM

The platypus has a bill like a duck, a tail like a beaver, and webbed feet like an otter.

Platypuses don't have teeth — they scoop up mud and use gravel to grind up their food.

A platypus can hold its breath underwater for up to two minutes while hunting.

Eats: Carnivore (meat)
Habitat: Rivers and streams
Danger: Keep Your Distance

Platypus

Australia

Finish Me!

Draw my back legs! Then color me in with bright colors.

Poison Dart Frog

Riverbend Aquarium

The golden poison dart frog is the most poisonous — it's bright yellow and smaller than a bottle cap.

Indigenous people in Colombia used the frogs' poison on their hunting arrows.

Poison dart frogs can be red, blue, yellow, green, or even spotted like strawberries.

Eats: Carnivore (meat)
Habitat: Rainforest floors
Danger: Extremely Dangerous

Poison Dart Frog

South America and Central America

Invent an Animal!

Mix two animals together to make a brand-new one. Draw it, then give it a name!
