

RIVERBEND
AQUARIUM

Animal Coloring & Activity Book

20 Animals from Oceans, Rivers & Rainforests to Color & Solve

Example book. Riverbend Aquarium is a fictional venue.

Wild Atlas

Welcome to Riverbend Aquarium!

Our story

Riverbend Aquarium opened in 1987, started by teachers, fishers and neighbors who wanted every child in town to meet the animals of the water up close. Today we care for more than 25 kinds of animals and give rescued otters and sea lions a safe home. Every visit helps fund animal care, rescue work and free school programs. We hope this book keeps the wonder going long after you leave.

How this book works

Every animal gets two pages: the animal to color on the left, with real facts to read aloud, and a puzzle or something to draw on the right. Read each one-line instruction once; the little picture reminds your explorer what to do. Crayons and colored pencils work best. Most answers are printed upside down on the page; the rest are in the answer key.

A free animal pack

This book includes a free animal pack for the Wild Atlas app, a safe, ad-free animal encyclopedia for kids. The claim page is near the back of the book.

ENTRANCE

You are here!

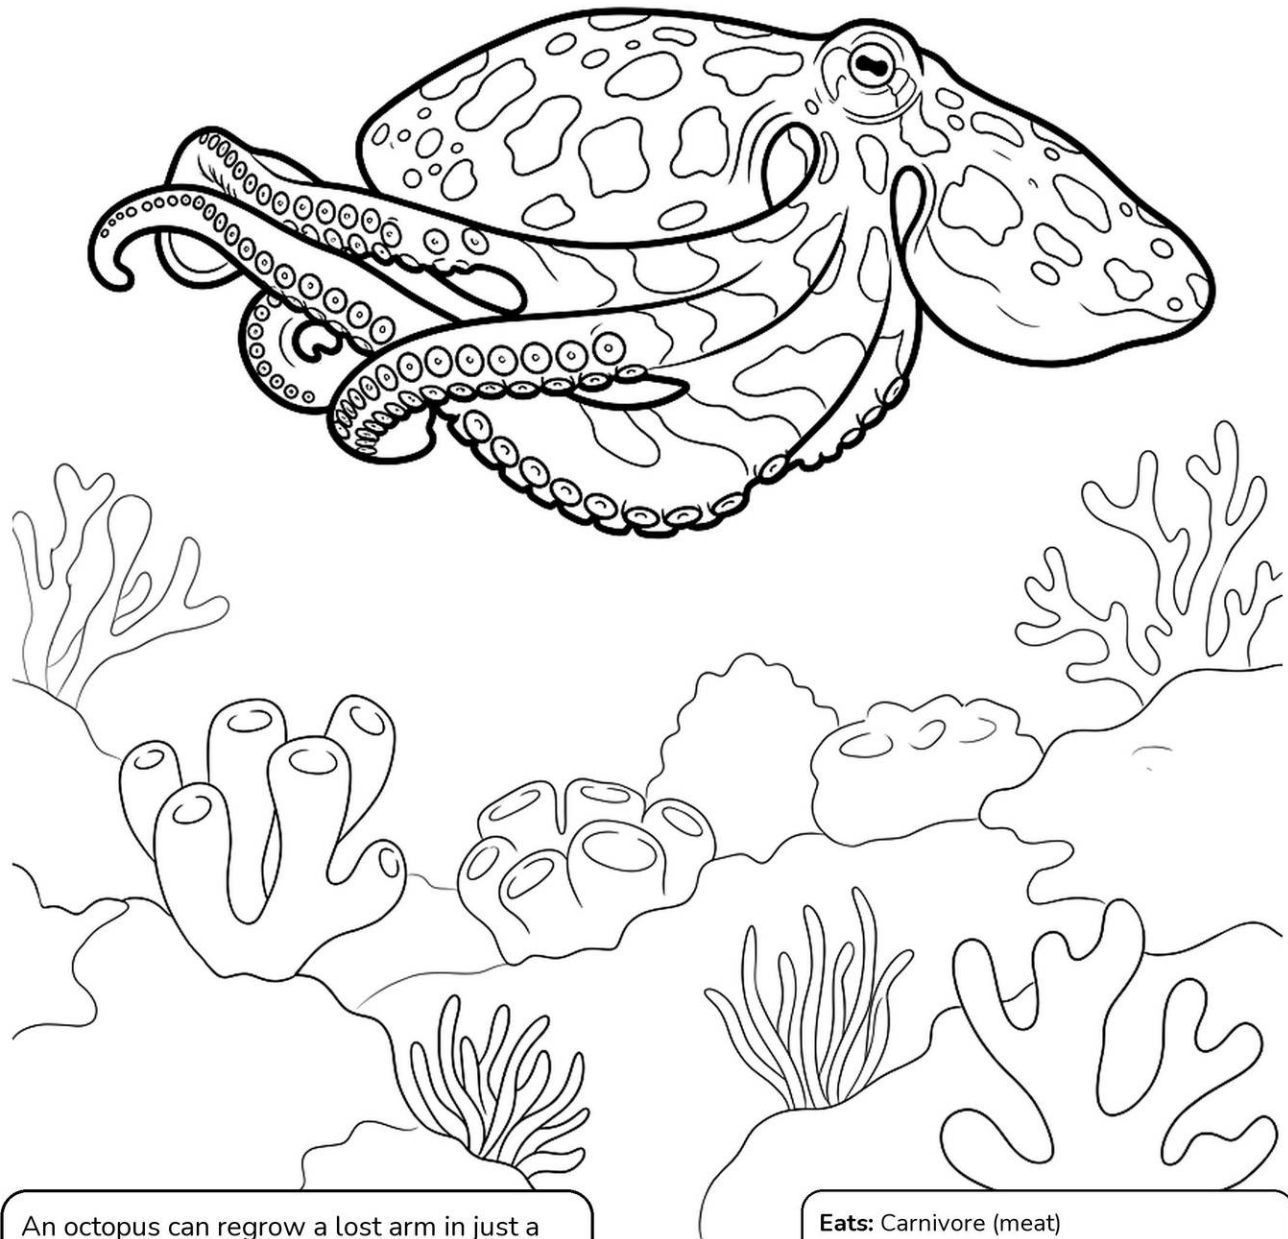

Wild Atlas

Octopuses have three hearts — two pump blood to their gills and one pumps blood to the rest of their body.

When an octopus swims fast, its main heart stops beating!

An octopus can regrow a lost arm in just a few months.

Eats: Carnivore (meat)
Habitat: Ocean waters
Danger: Low Risk

Octopus

World's oceans

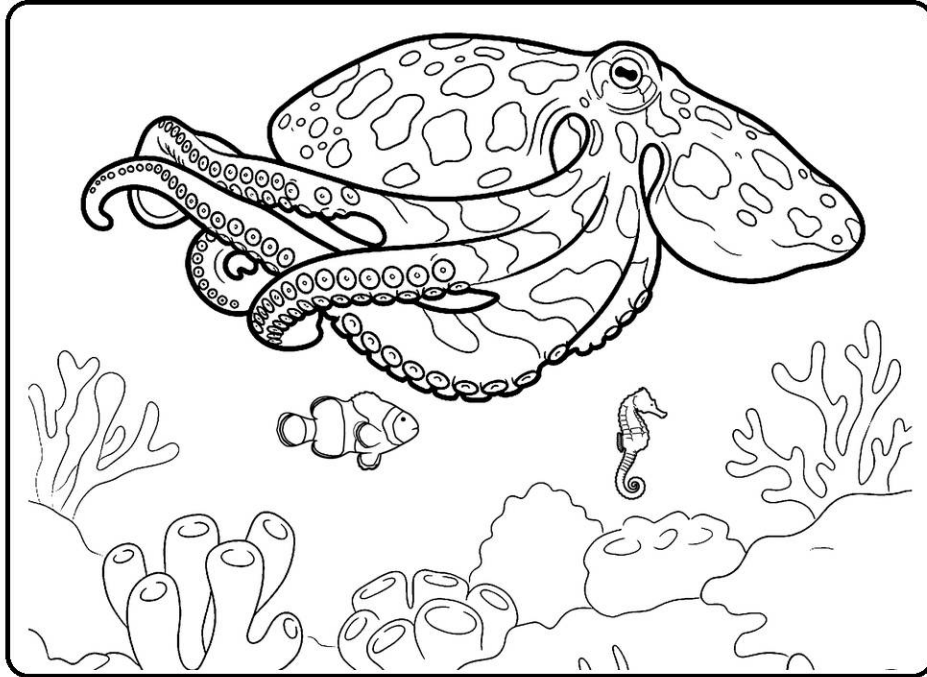

Wild Atlas

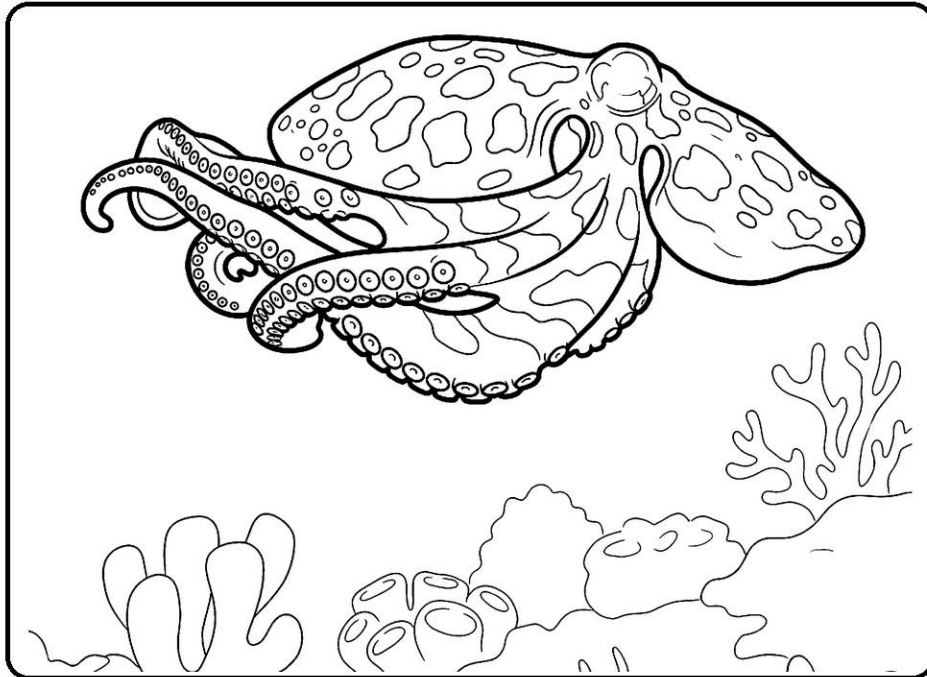

Spot the Difference

Find 5 things missing in the bottom picture. Circle them!

○ ○ ○ ○ ○

Octopus

Riverbend Aquarium

Wild Atlas

Capybaras eat their own poop to get extra vitamins from their food.

Their teeth never stop growing, so they chew tough grasses to keep them short.

They love to take mud baths to cool off on hot days.

Eats: Herbivore (plants)
Habitat: Rivers, lakes, and wetlands
Danger: Safe

Capybara

South America

Wild Atlas

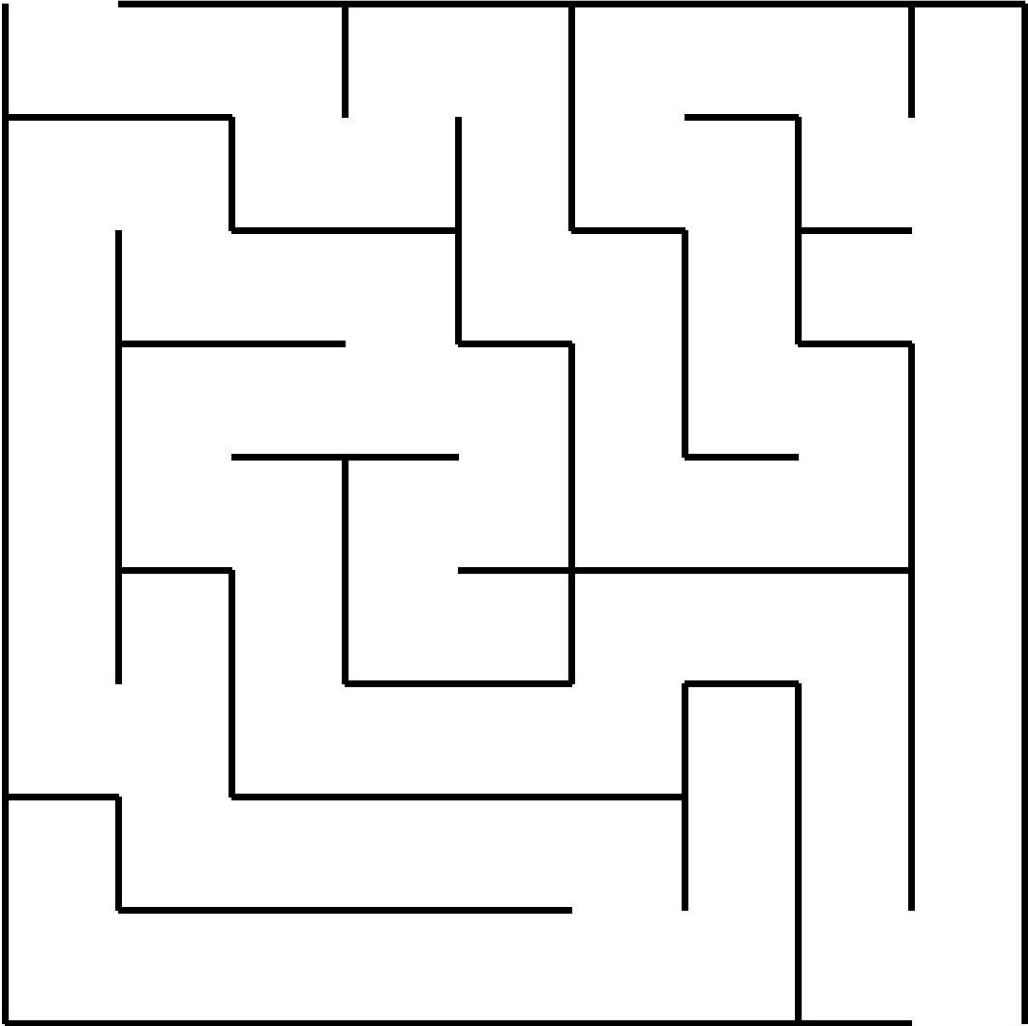

Amazing Maze

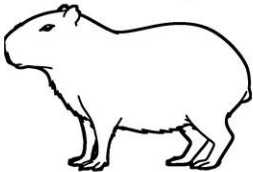

Help the little capybara find its mom!

Baby  

Mom

Capybara

Riverbend Aquarium

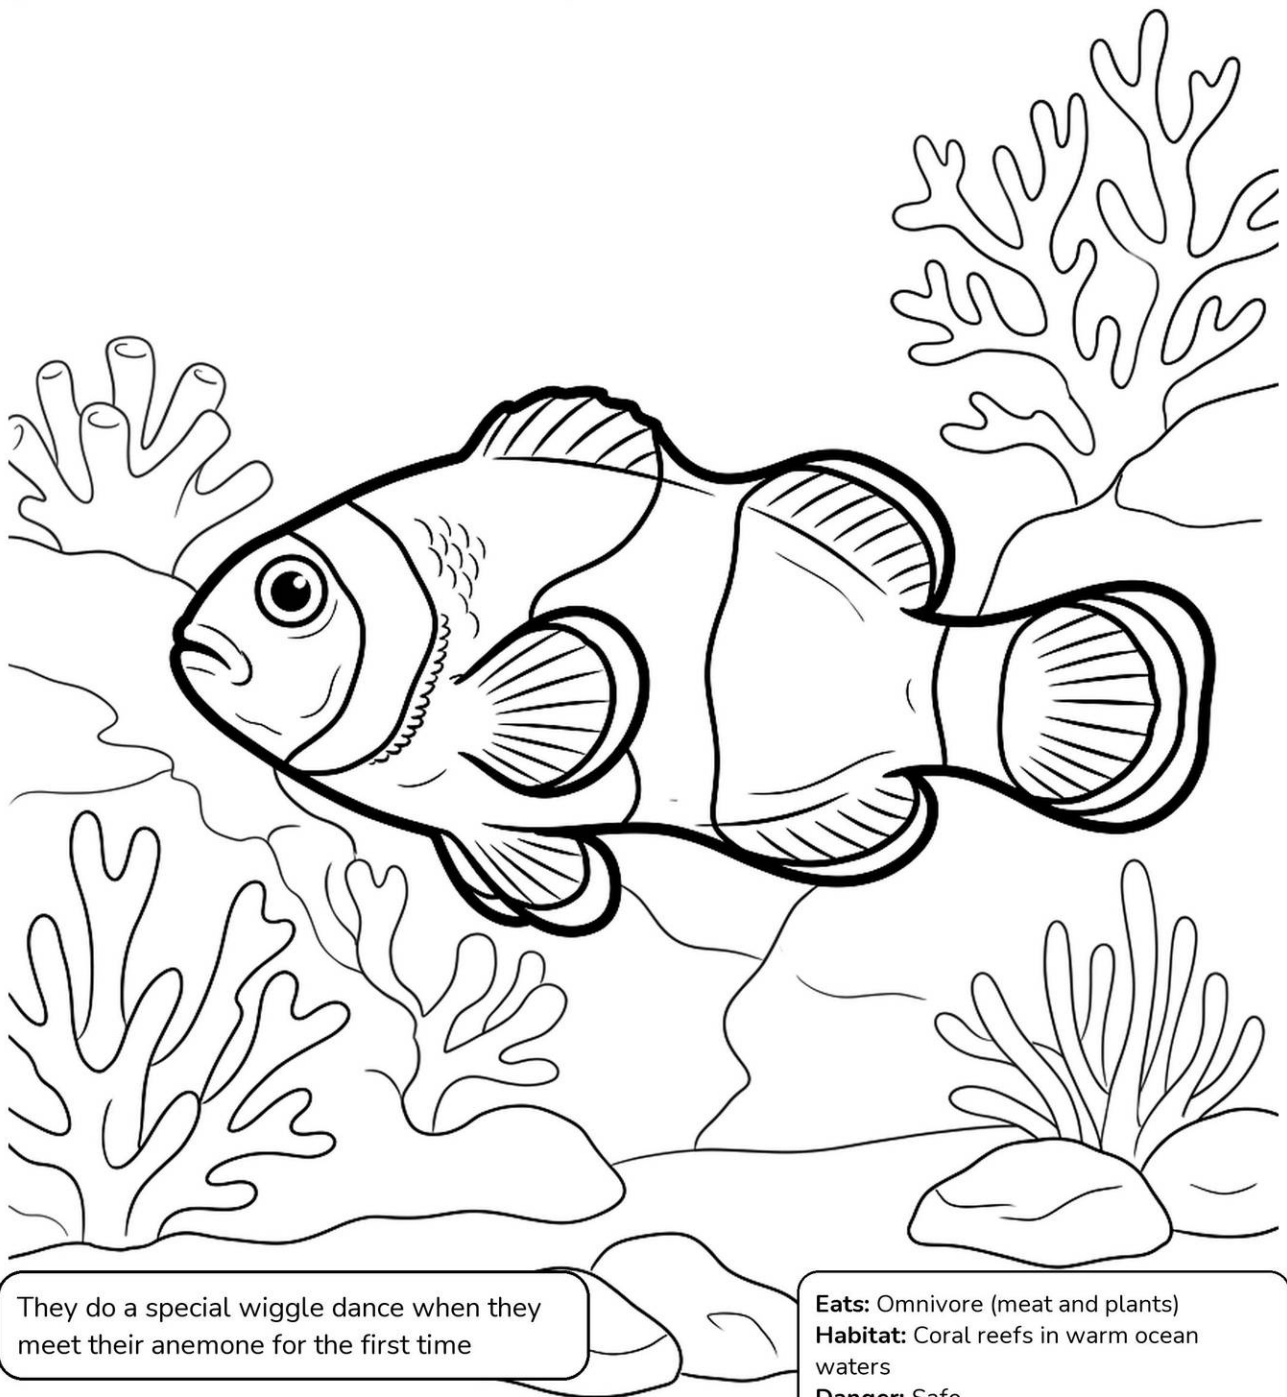

Wild Atlas

Clownfish cover themselves in special mucus so anemone tentacles won't sting them

A clownfish dad protects hundreds of eggs until they hatch

They do a special wiggle dance when they meet their anemone for the first time

Eats: Omnivore (meat and plants)
Habitat: Coral reefs in warm ocean waters
Danger: Safe

Clownfish

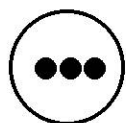

Indian Ocean and Pacific Ocean

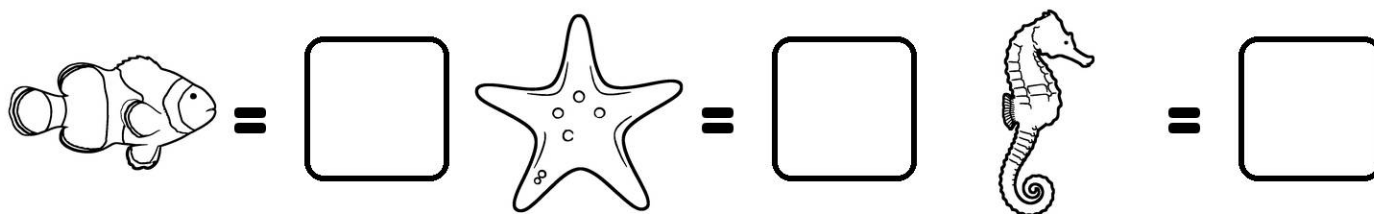

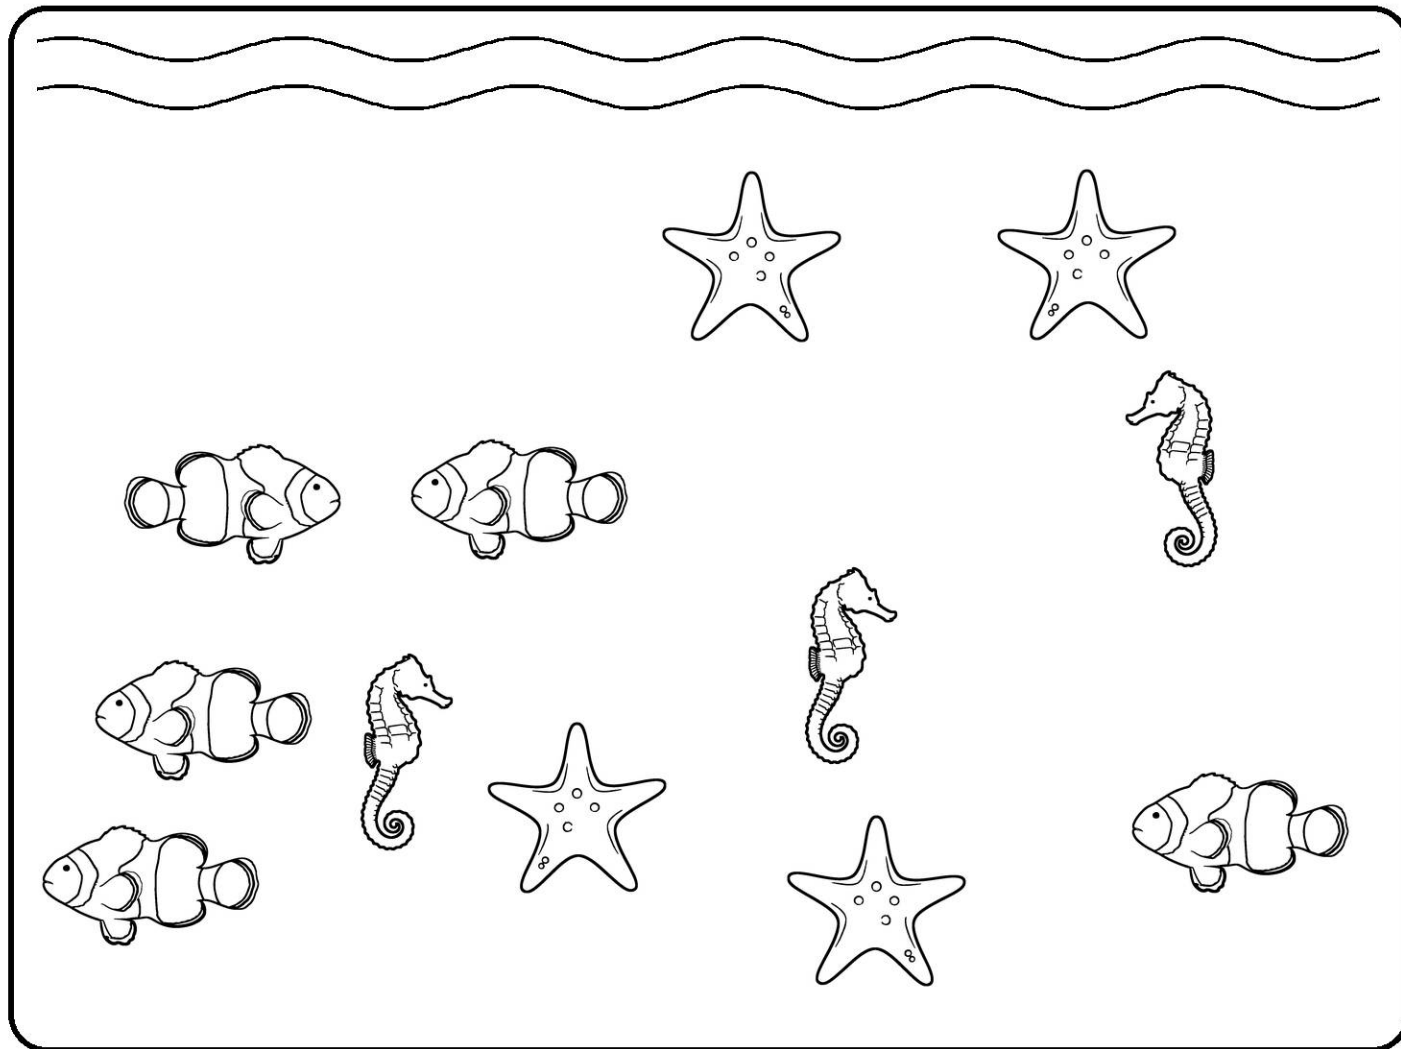

Wild Atlas

Count & Color

Count each animal. Write the number. Then color the picture!

Answers: Clownfish 5, Starfish 5, Seahorse 3

Clownfish

Riverbend Aquarium

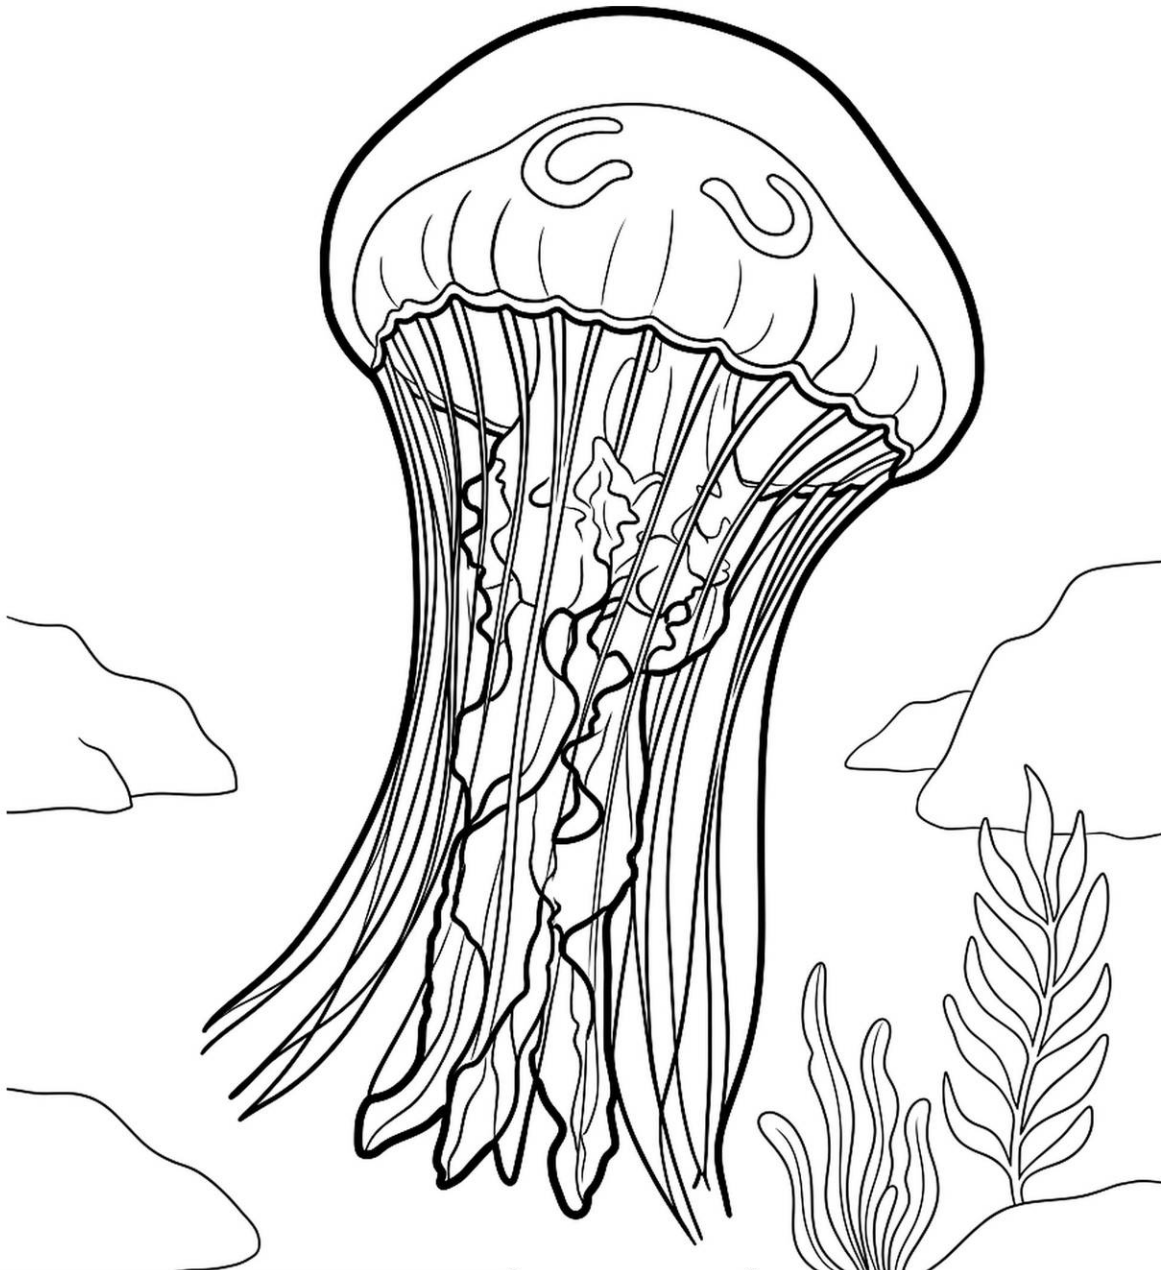

Wild Atlas

Jellyfish are about 95% water, so they look almost see-through.

They catch food using special stinging cells on their tentacles.

They move by squeezing their bell-shaped body like a pump.

Eats: Carnivore (meat)
Habitat: Oceans worldwide
Danger: Dangerous

Jellyfish

World's oceans

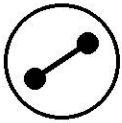

Wild Atlas

AQUARIUM

Shadow Match

Draw a line from each animal to its shadow.

Jellyfish

Riverbend Aquarium

Wild Atlas

It floats on its back with its paws tucked up, bobbing along on top of the waves.

When the sea otter wants a snack, it balances a rock on its belly and taps a clam against it until it pops open.

It has the thickest, softest fur of any animal on Earth, with millions of tiny hairs keeping it warm in the cold sea.

Eats: Carnivore (meat)
Habitat: Coastal kelp forests and rocky shorelines
Danger: Safe

Sea Otter

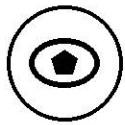

On four continents

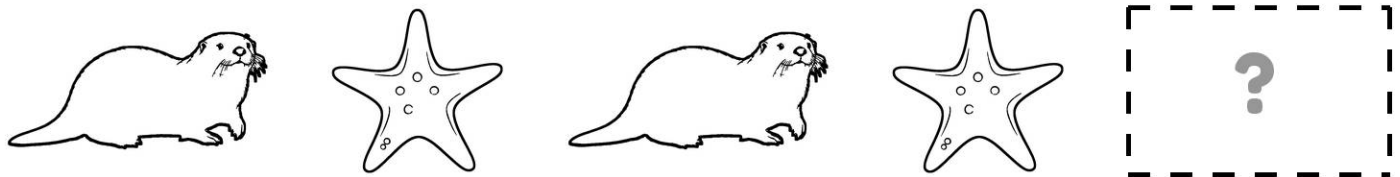

Wild Atlas

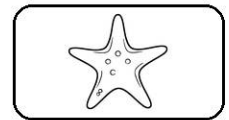

What Comes Next?

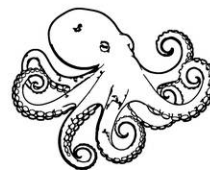

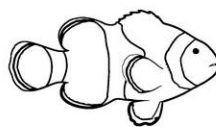

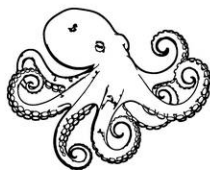

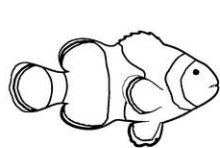

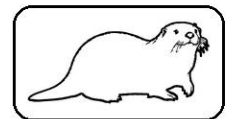

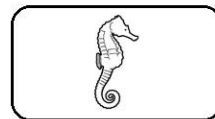

Look at the pattern. Circle the animal that comes next.

Sea Otter

Riverbend Aquarium

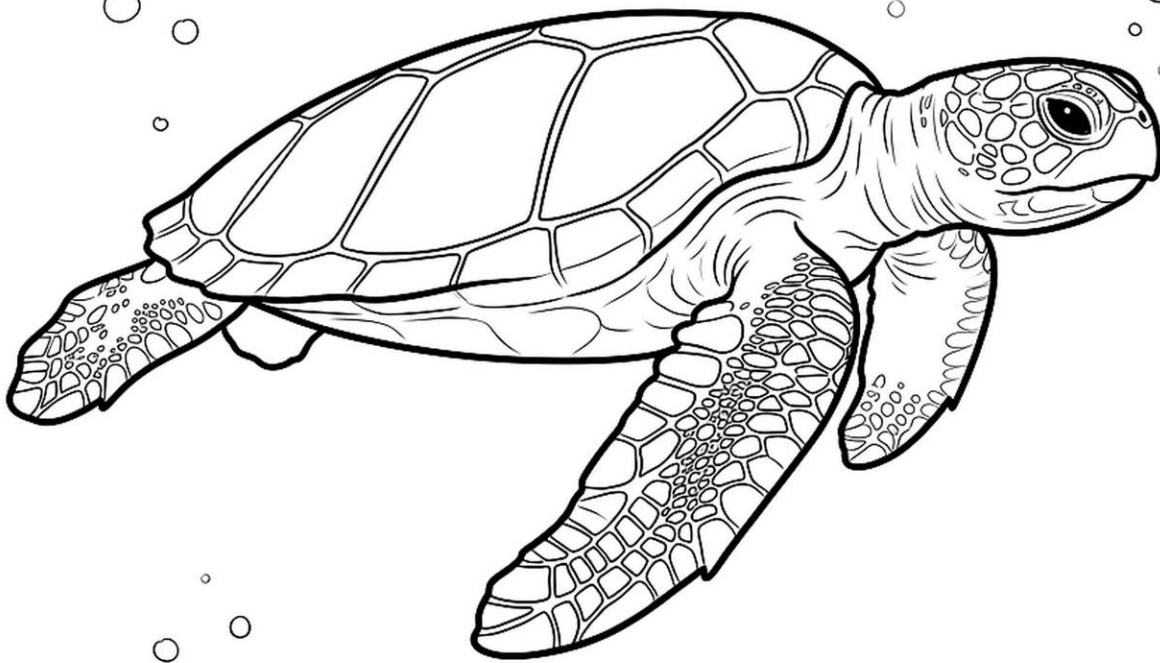

Wild Atlas

Baby sea turtles hatch at night and race to the ocean guided by moonlight on the waves.

Leatherback sea turtles can dive deeper than 1,200 metres — that's as deep as four Eiffel Towers stacked on top of each other.

Sea turtles can't pull their heads and flippers into their shells like land turtles can.

Eats: Omnivore (meat and plants)
Habitat: Warm tropical oceans and sandy beaches
Danger: Safe

Sea Turtle

World's oceans

RIVERBEND
AQUARIUM

Friendly or Stay Away?

Circle the smiley face or the warning sign for each animal.

Stay away: Jellyfish, Poison Dart Frog. The rest are friendly.

Sea Turtle

Some animals are safest from far away!

Wild Atlas

Seahorses swim upright, not flat like other fish.

A seahorse can eat up to 3,000 tiny shrimp in one day.

Baby seahorses are called fry and are smaller than a grain of rice when they're born.

Eats: Carnivore (meat)
Habitat: Shallow coastal waters with seagrass and coral
Danger: Safe

Seahorse

Worldwide

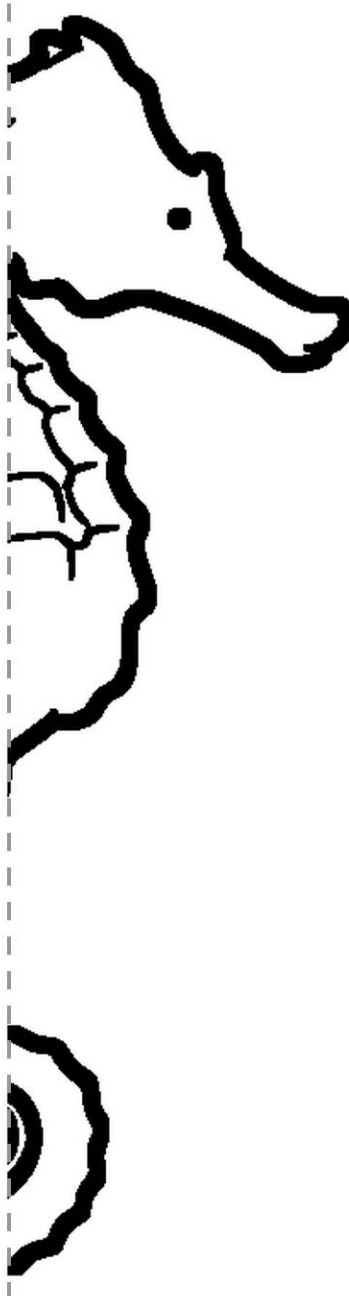

Wild Atlas

Finish Me!

Oh no! Part of me is missing. Draw my tail and my back fin.
Then color me in!

Seahorse

Riverbend Aquarium

Wild Atlas

Hippos spend most of their day in the water to keep their skin cool and moist.

At night, hippos leave the water to eat grass — they can eat 80 pounds in one night!

A hippo's eyes, ears, and nose are all on top of its head so it can see and breathe while mostly underwater.

Eats: Herbivore (plants)
Habitat: Rivers and lakes
Danger: Extremely Dangerous

Hippopotamus

Africa

Wild Atlas

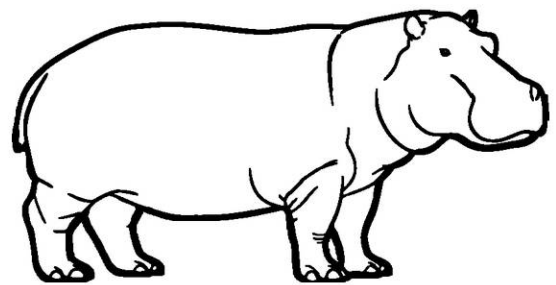

RIVERBEND
AQUARIUM

Draw My Home

I live in rivers and lakes in Africa. Draw my home: add water and reeds!

Hippopotamus

Riverbend Aquarium

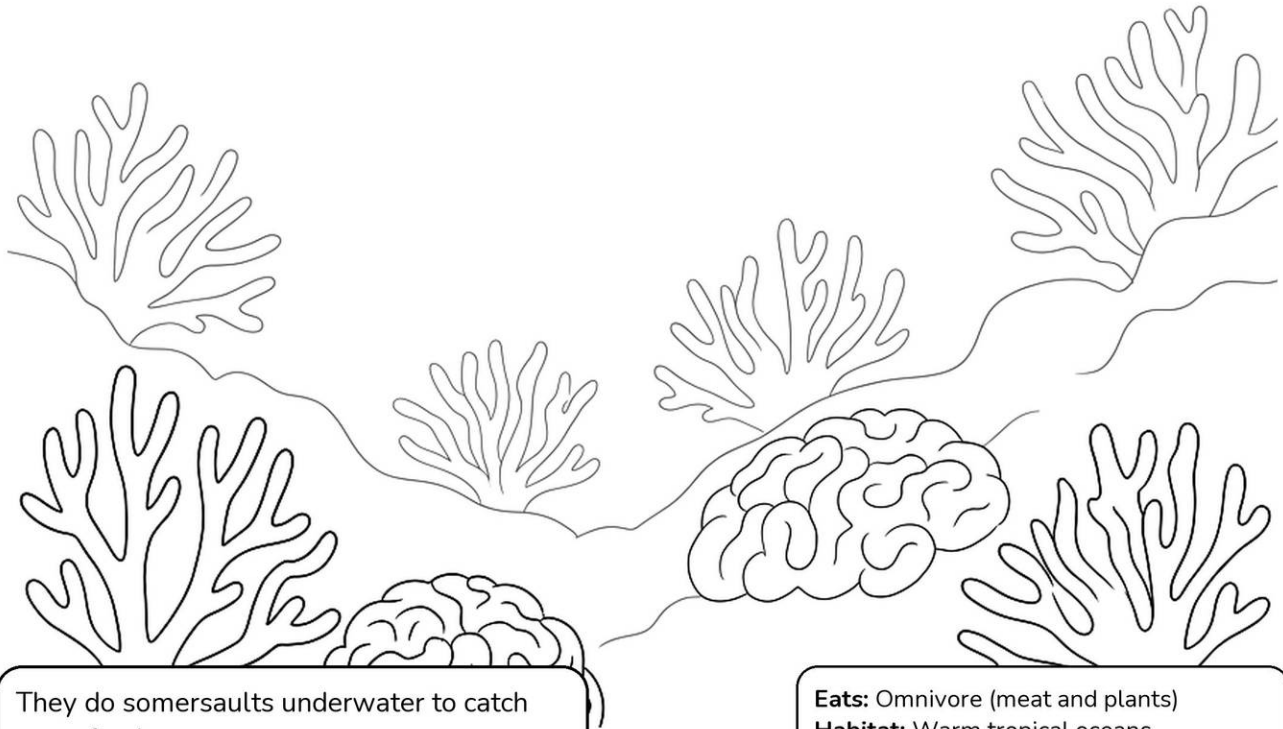

Wild Atlas

Manta rays can grow as wide as a small car.

They eat tiny floating animals called plankton by filtering water through their mouths.

They do somersaults underwater to catch more food.

Eats: Omnivore (meat and plants)
Habitat: Warm tropical oceans
Danger: Safe

Manta Ray

Trace & Write

Trace my name. Then write it by yourself!

Manta

Manta

Manta Ray

Riverbend Aquarium

Wild Atlas

Sea lions can rotate their back flippers forward to walk on land like a four-legged animal.

They have ear flaps on the outside of their heads — seals have ears but no flaps you can see.

A sea lion's whiskers are so sensitive they can feel a fish swimming by in complete darkness.

Eats: Carnivore (meat)
Habitat: Rocky coastlines and beaches
Danger: Low Risk

Sea Lion

Pacific Ocean and Southern Ocean

or

Glass Frog

Real sizes from the Wild Atlas app

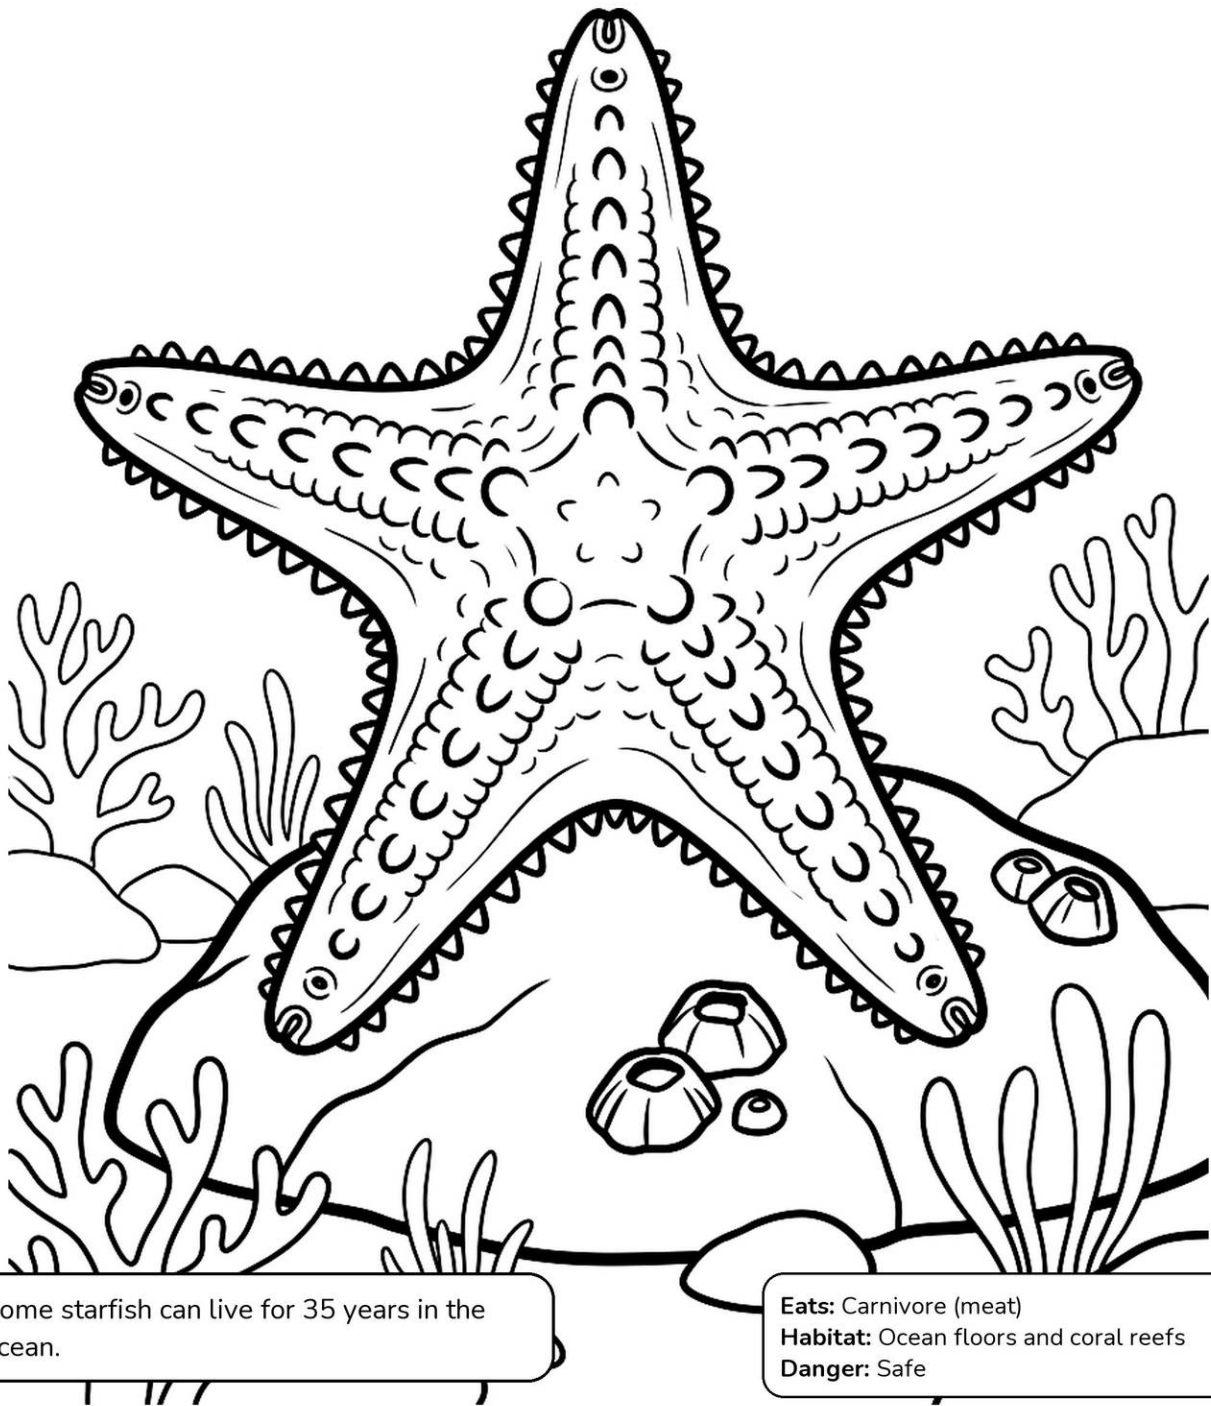

Wild Atlas

Starfish aren't actually fish — they're more closely related to sea urchins.

They move using hundreds of tiny tube feet on the bottom of their arms.

Some starfish can live for 35 years in the ocean.

Eats: Carnivore (meat)
Habitat: Ocean floors and coral reefs
Danger: Safe

Starfish

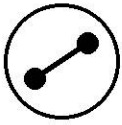

World's oceans

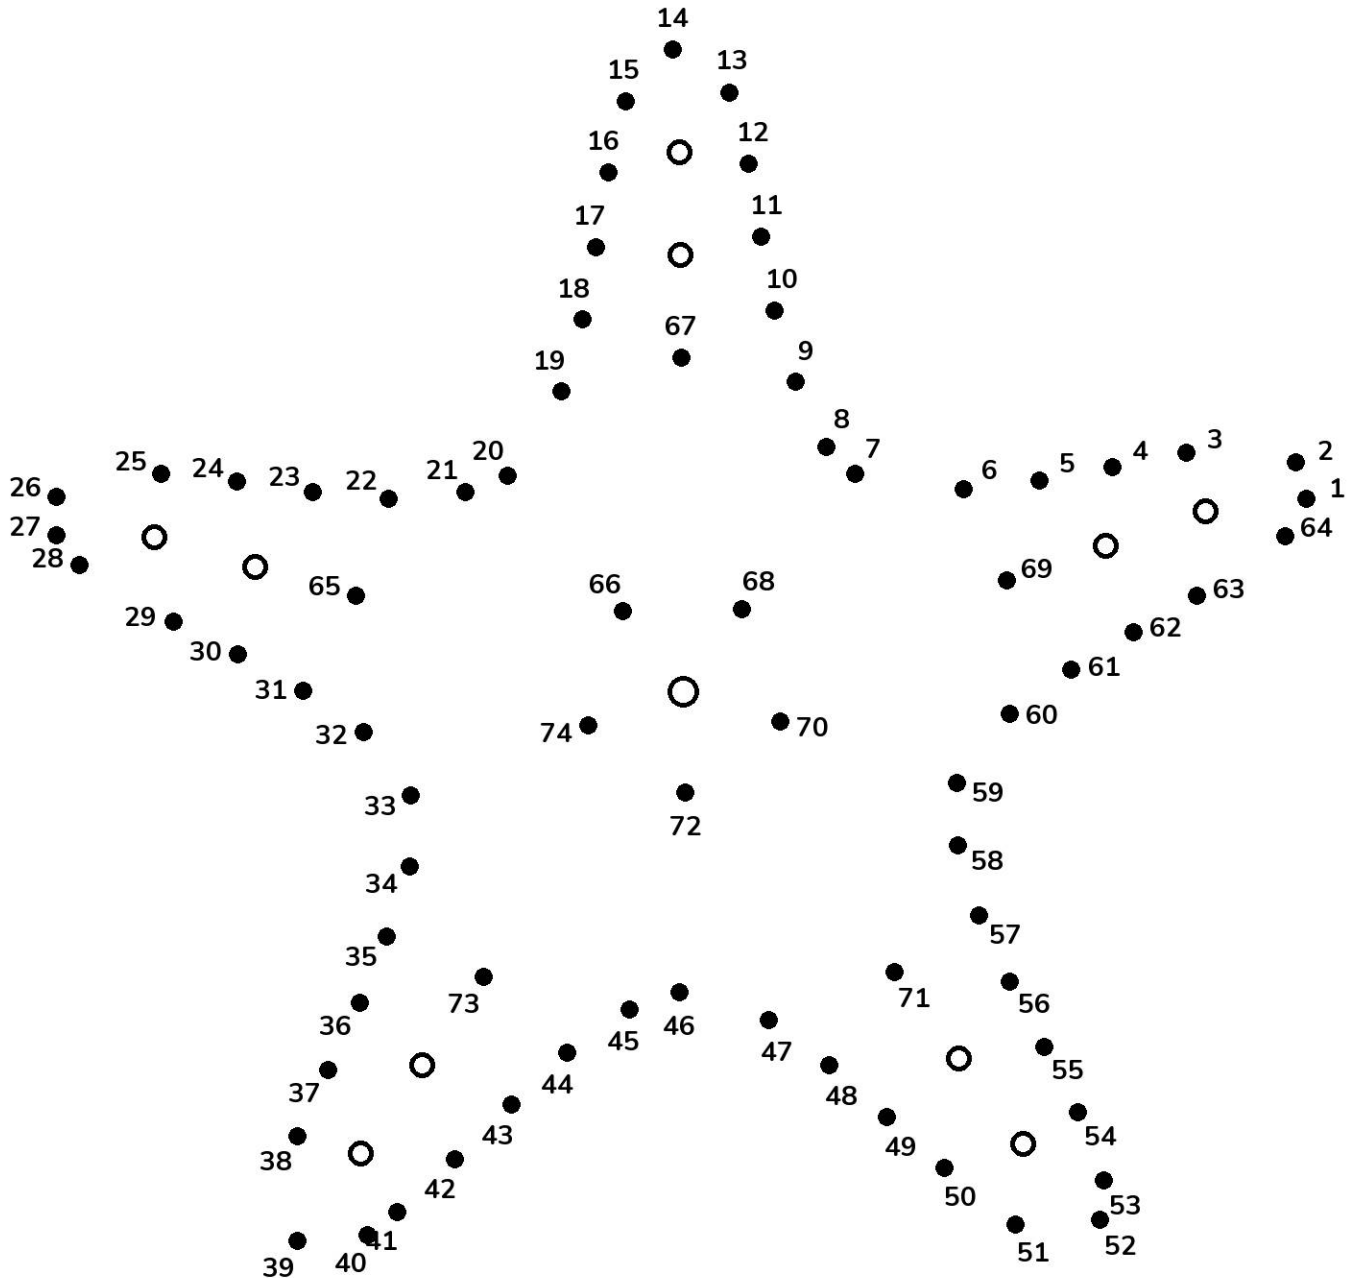

Wild Atlas

Dot-to-Dot

Connect the dots from 1 to the end, even the star inside.
Then color me in!

Starfish

Riverbend Aquarium

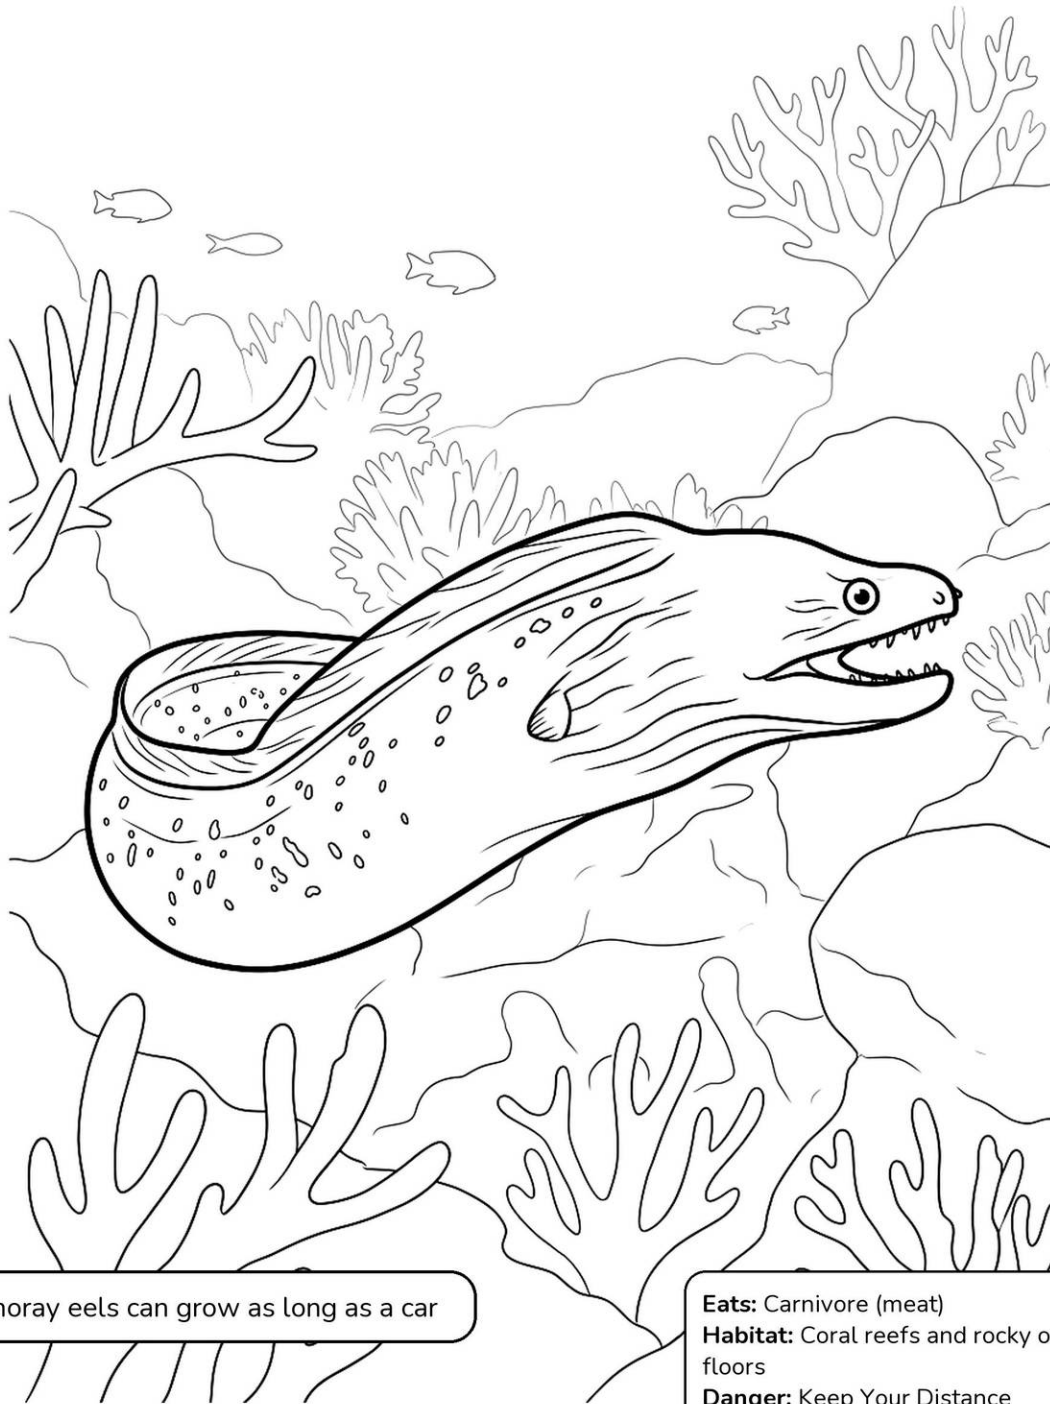

Wild Atlas

Moray eels sleep during the day with their mouths open to breathe

They have terrible eyesight and hunt mostly by smell

Some moray eels can grow as long as a car

Eats: Carnivore (meat)
Habitat: Coral reefs and rocky ocean floors
Danger: Keep Your Distance

Moray Eel

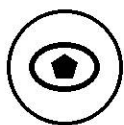

World's oceans

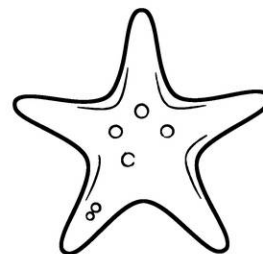

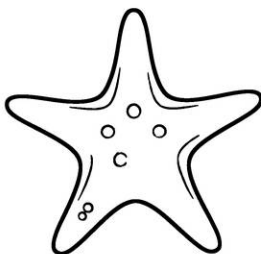

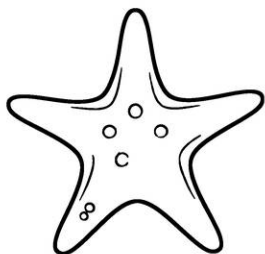

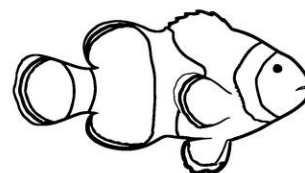

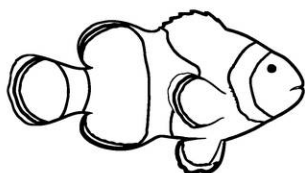

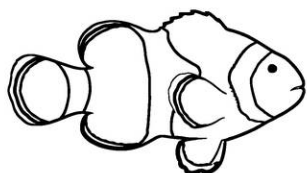

Wild Atlas

Odd One Out

Circle the one that is different in each row.

Answers: row 1: #4, row 2: #3, row 3: #3, row 4: #2

Moray Eel

Row 4 is tricky — look closely!

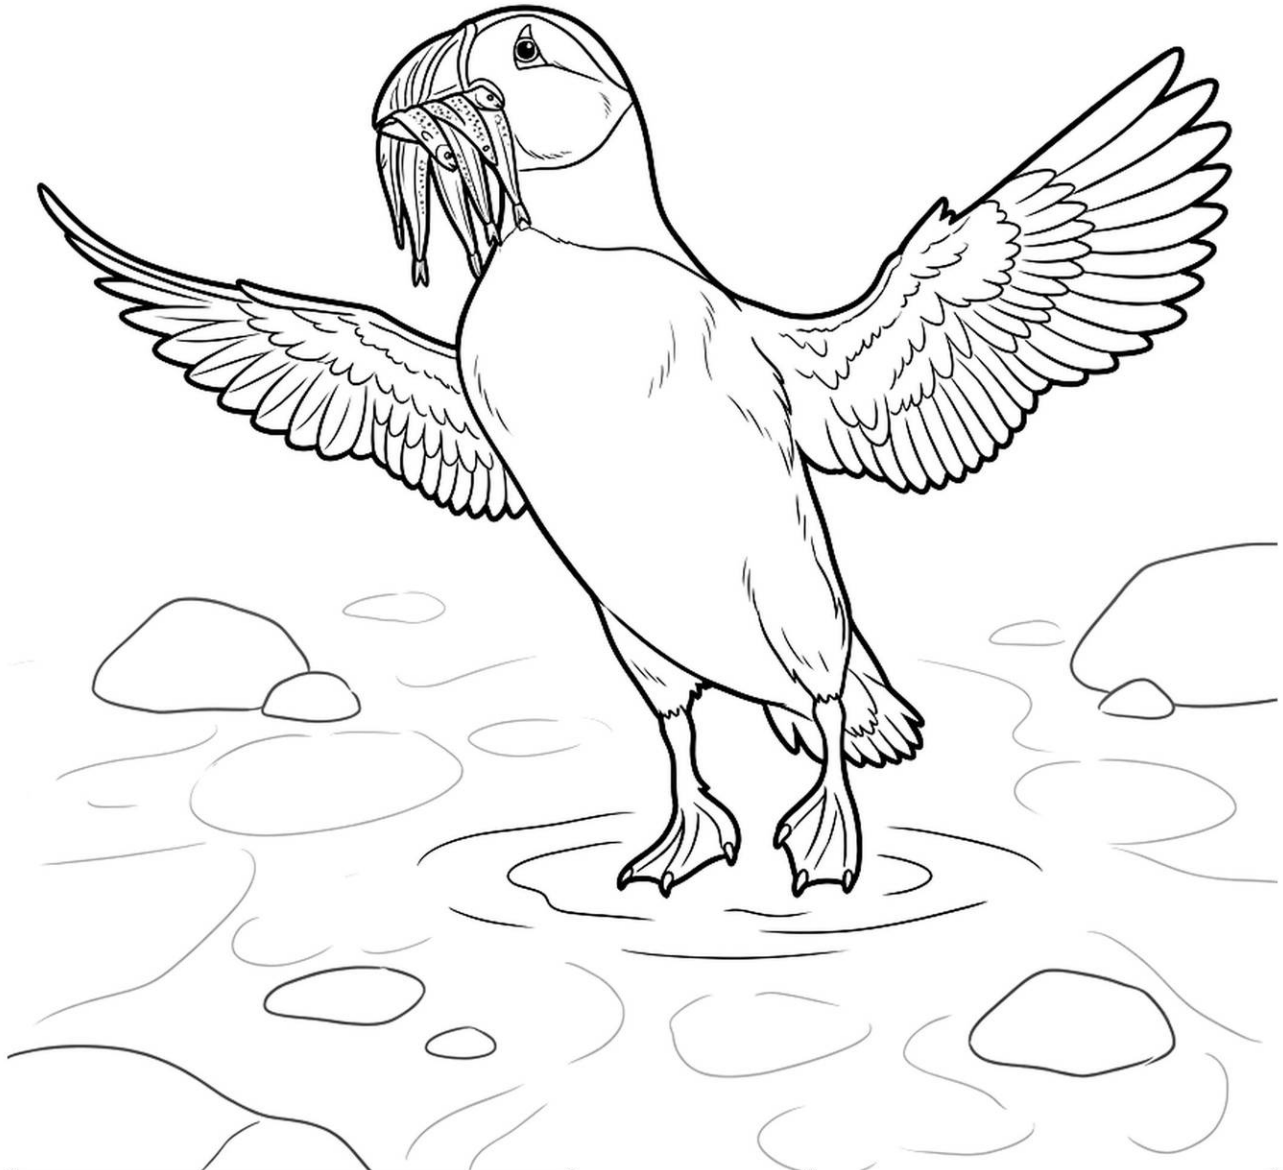

Wild Atlas

Baby puffins are called pufflings and they're covered in fluffy gray feathers.

Puffins spend most of their life at sea and only come to land to have babies.

They can swim underwater using their wings like flippers.

Eats: Carnivore (meat)
Habitat: Rocky islands and cliffs
Danger: Safe

Atlantic Puffin

North Atlantic Ocean

Answers: Puffin, Octopus, Otter, Clownfish, Starfish

Atlantic Puffin

Riverbend Aquarium

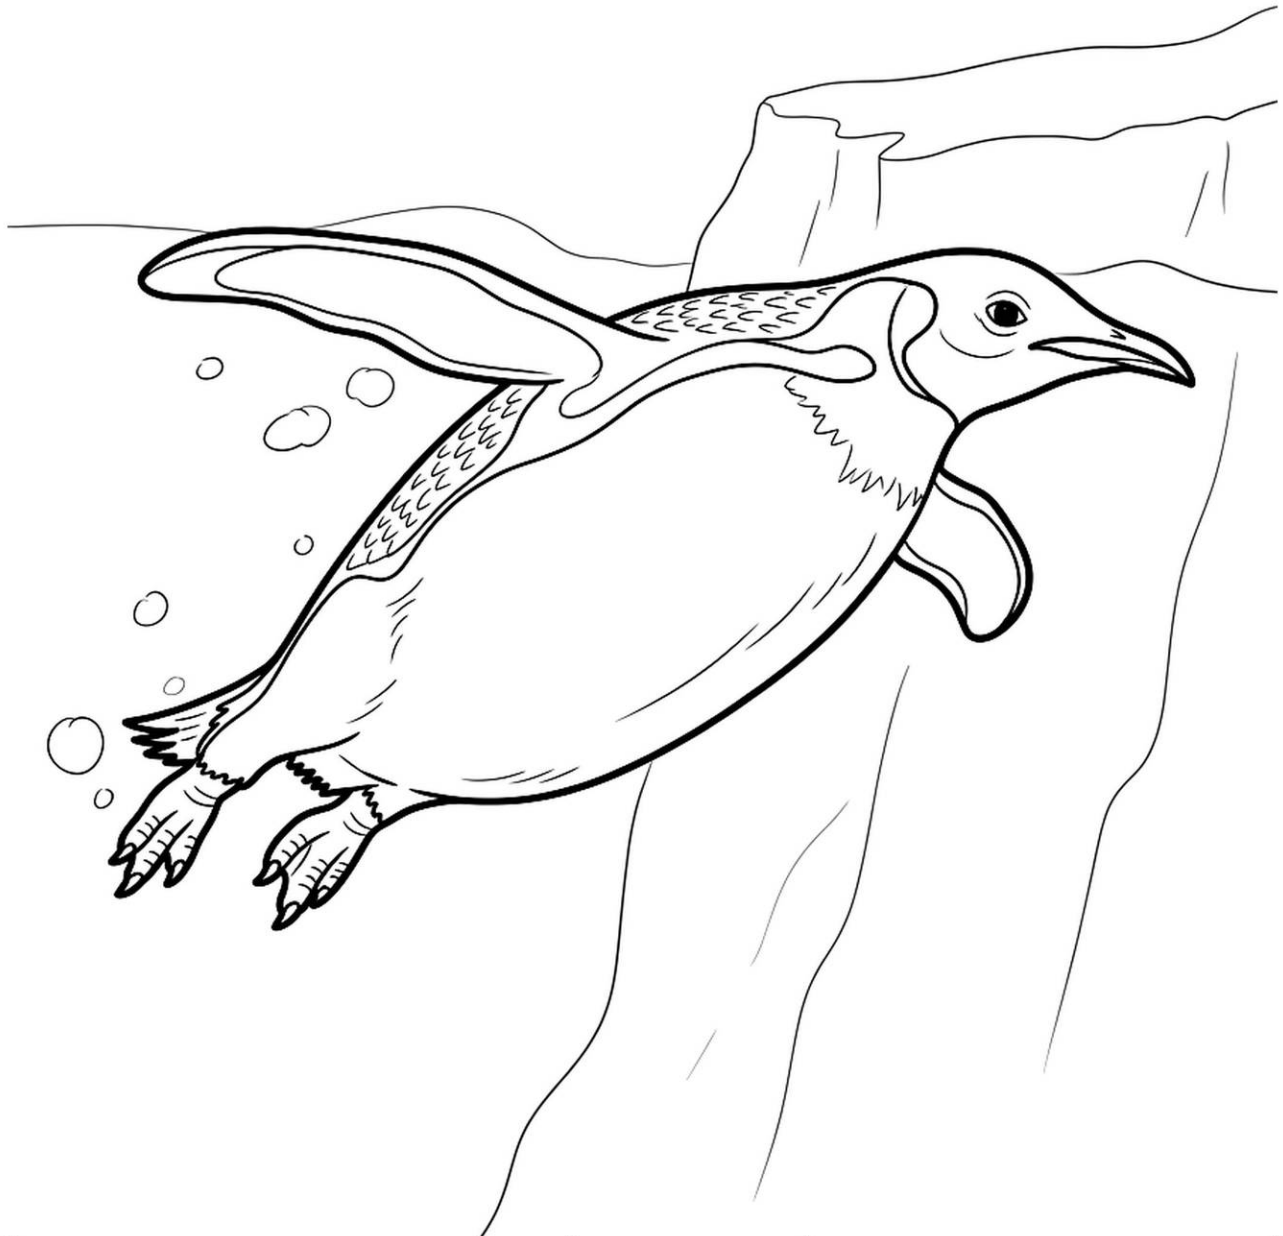

Wild Atlas

Emperor penguins toboggan on their bellies across the ice to move faster.

Their black and white coloring helps them hide from predators — white belly from below, black back from above.

Baby emperors can't swim until they lose their fluffy baby feathers and grow waterproof adult feathers.

Eats: Carnivore (meat)
Habitat: Antarctic ice and ocean
Danger: Safe

Emperor Penguin

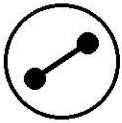

Antarctica

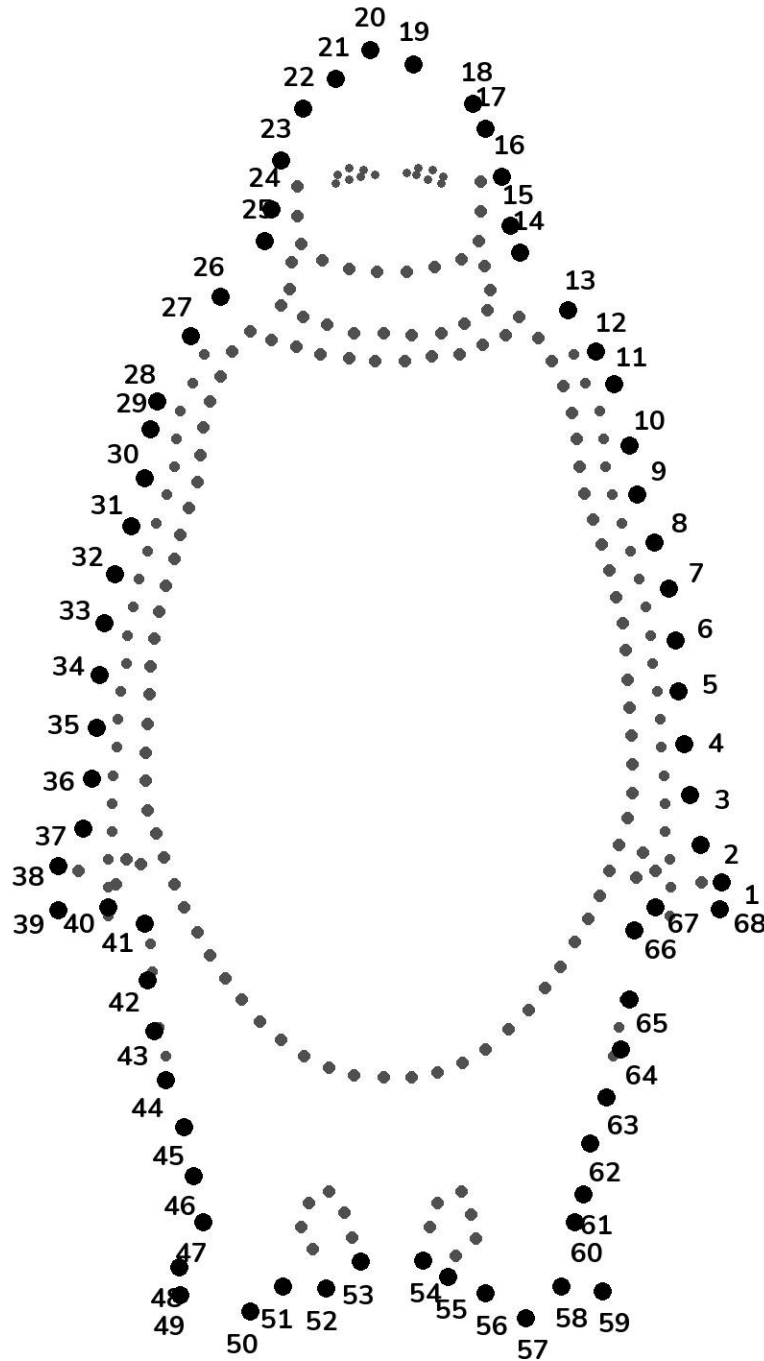

Wild Atlas

Dot-to-Dot

Connect the dots from 1 to the end. Then trace the dotted lines inside!

Emperor Penguin

Riverbend Aquarium

Wild Atlas

Tree frogs have tiny suction cups on their toes that help them stick to smooth surfaces.

They eat insects like flies, mosquitoes, and moths.

Some tree frogs are bright green, while others are brown or gray.

Eats: Carnivore (meat)
Habitat: Forests, rainforests, and trees near water
Danger: Safe

Tree Frog

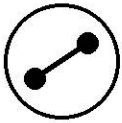

South America and Central America

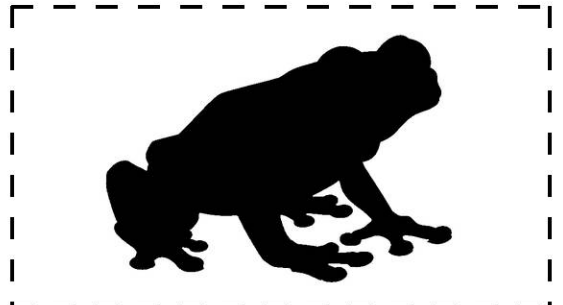

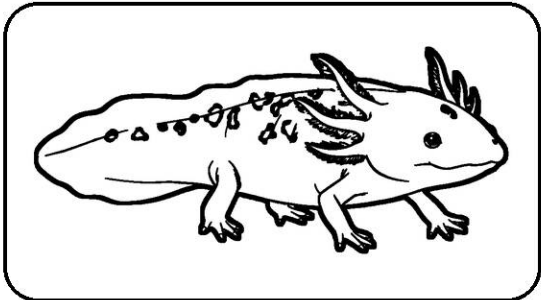

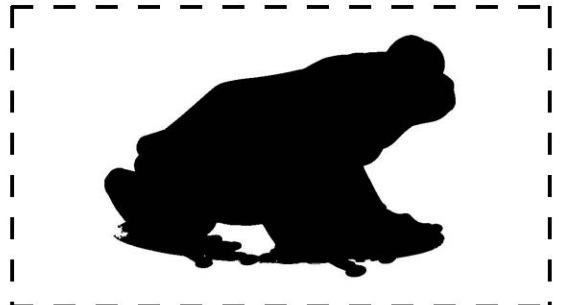

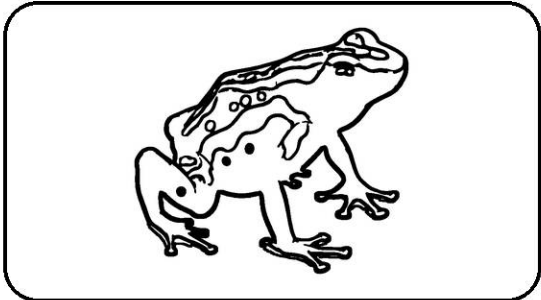

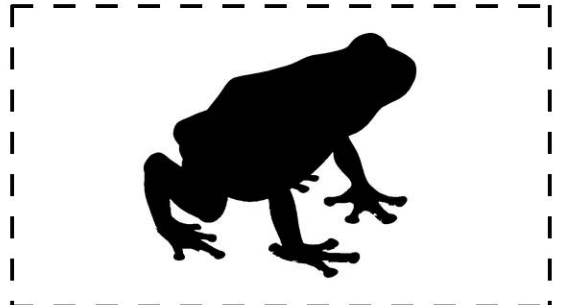

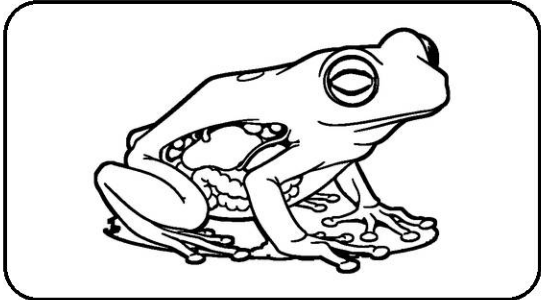

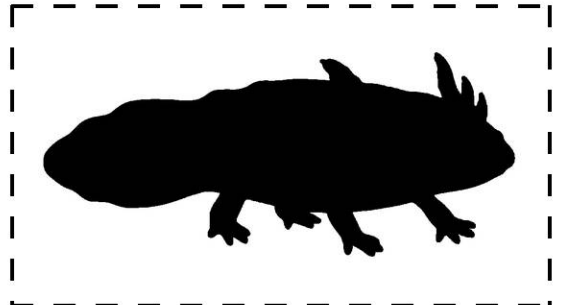

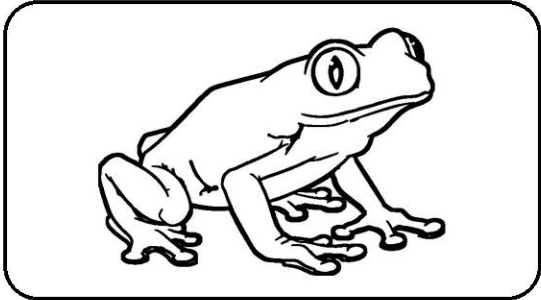

Wild Atlas

Shadow Match

Draw a line from each animal to its shadow.

Tree Frog

Riverbend Aquarium

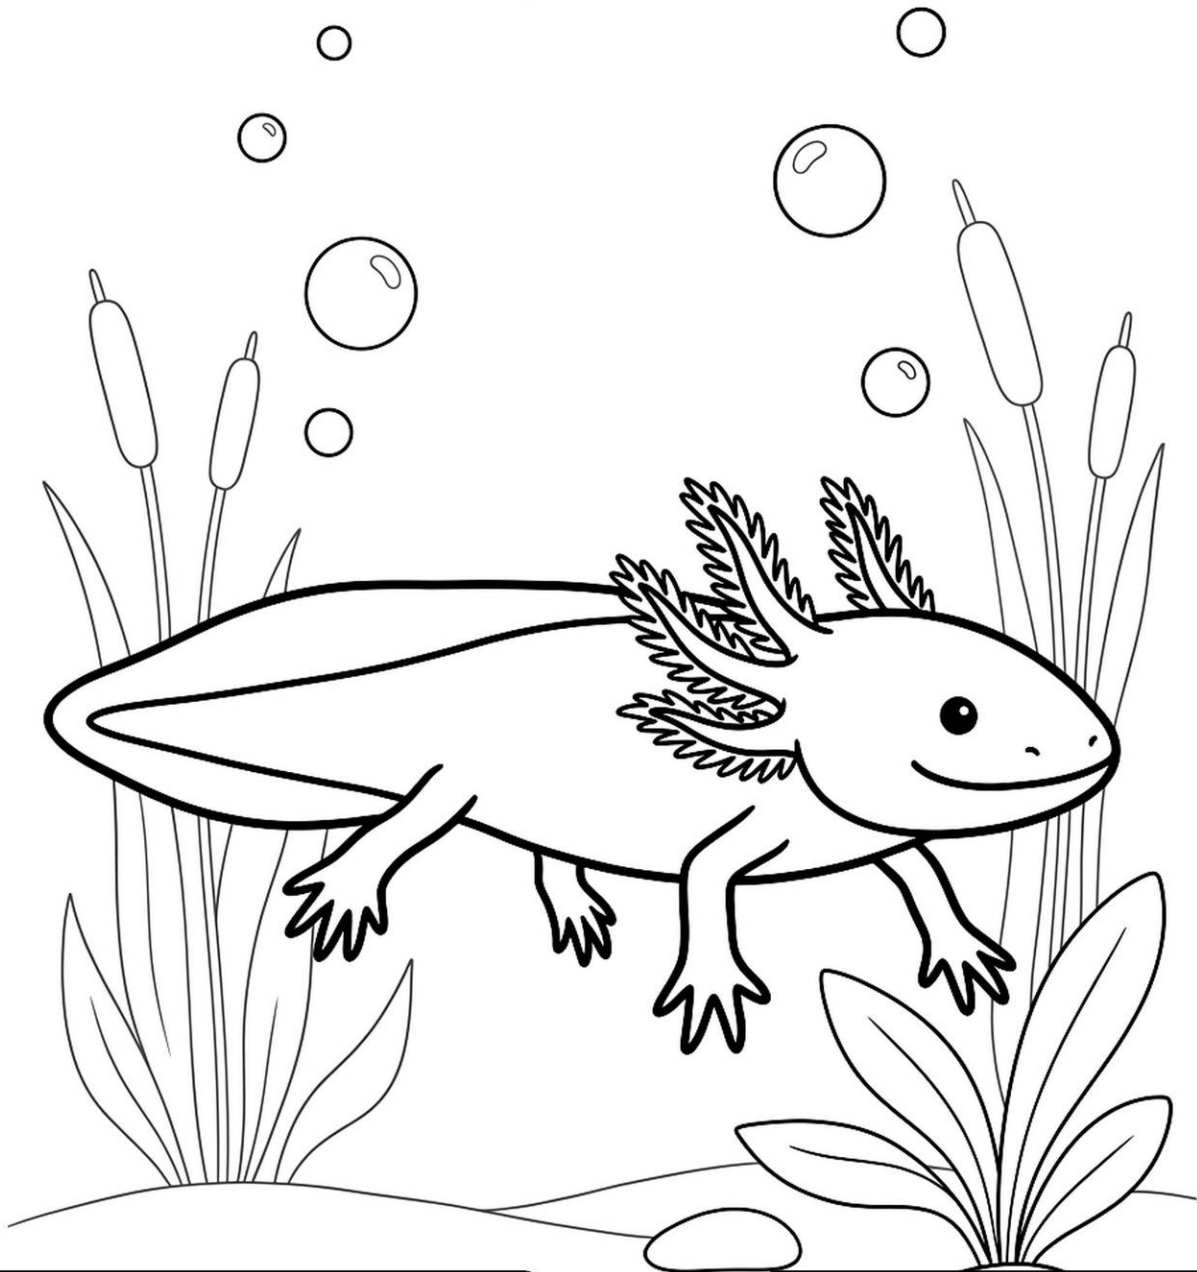

Wild Atlas

Those feathery pink branches around its head are gills, and that's how it breathes underwater.

If it loses a leg, a tail, or even a piece of its heart, it can grow a perfect new one.

It keeps its baby shape and lives in the water its whole life, never crawling onto land.

Eats: Carnivore (meat)
Habitat: Freshwater lakes and canals
Danger: Safe

Axolotl

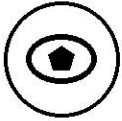

Mexico

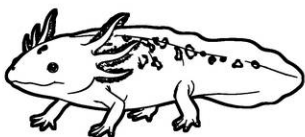

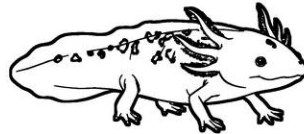

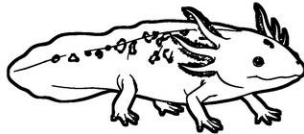

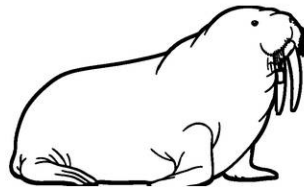

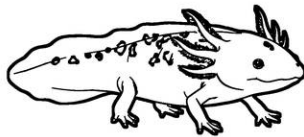

Wild Atlas

Odd One Out

Circle the one that is different in each row.

Answers: row 1: #3, row 2: #2, row 3: #4, row 4: #1

Axolotl

Row 4 is tricky — look closely!

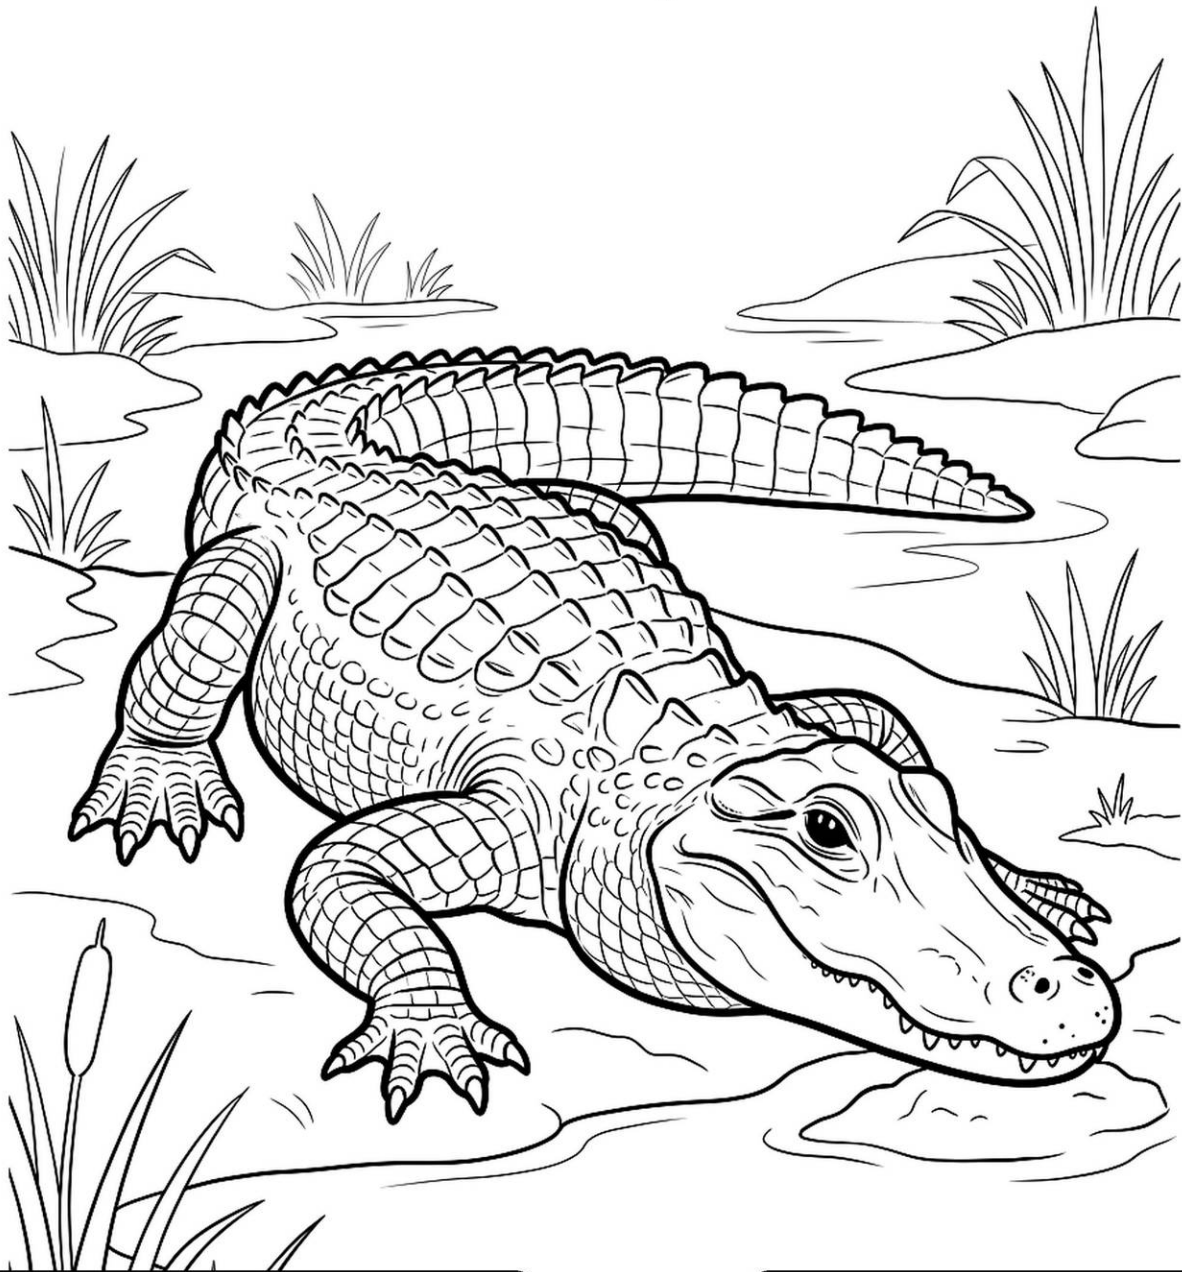

Wild Atlas

Alligators can't chew their food — they swallow it whole or tear it into chunks!

An alligator has about 80 teeth, and when one falls out, a new tooth grows back in its place.

They dig underwater dens called 'gator holes' that help other animals survive during droughts.

Eats: Carnivore (meat)
Habitat: Freshwater swamps, marshes, rivers, and lakes
Danger: Extremely Dangerous

Alligator

North America and China

Wild Atlas

Draw My Home

I live in rivers and swamps. Draw my home: add water, reeds and maybe a fish!

Alligator

Riverbend Aquarium

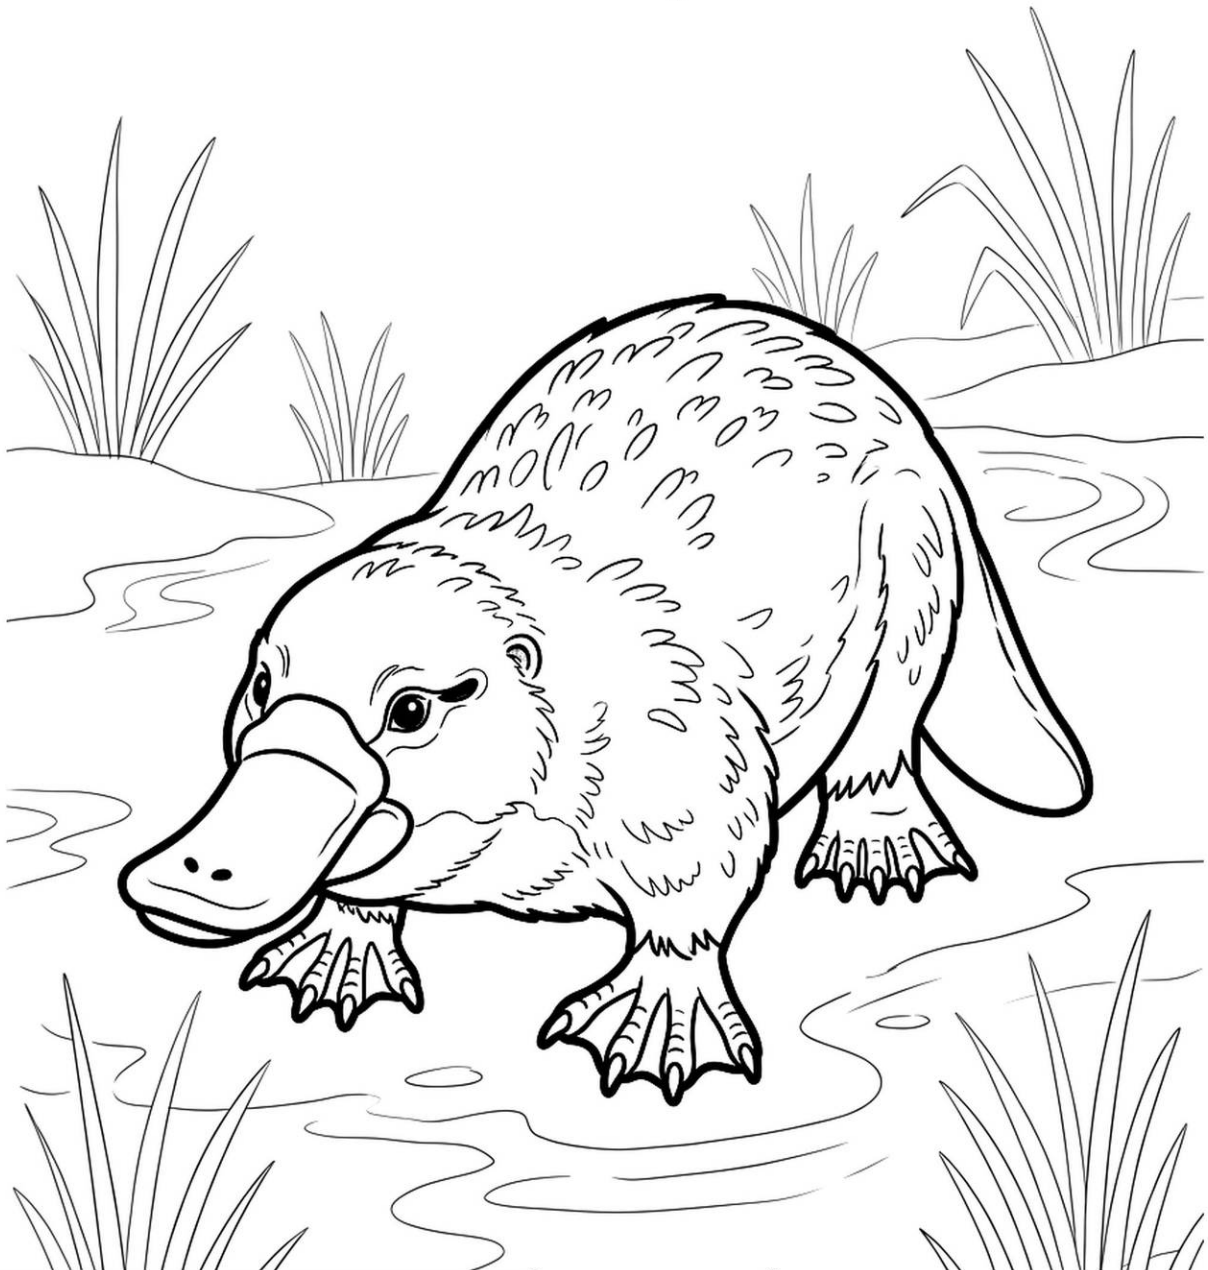

Wild Atlas

The platypus has a bill like a duck, a tail like a beaver, and webbed feet like an otter.

Platypuses don't have teeth — they scoop up mud and use gravel to grind up their food.

A platypus can hold its breath underwater for up to two minutes while hunting.

Eats: Carnivore (meat)
Habitat: Rivers and streams
Danger: Keep Your Distance

Platypus

Australia

Wild Atlas

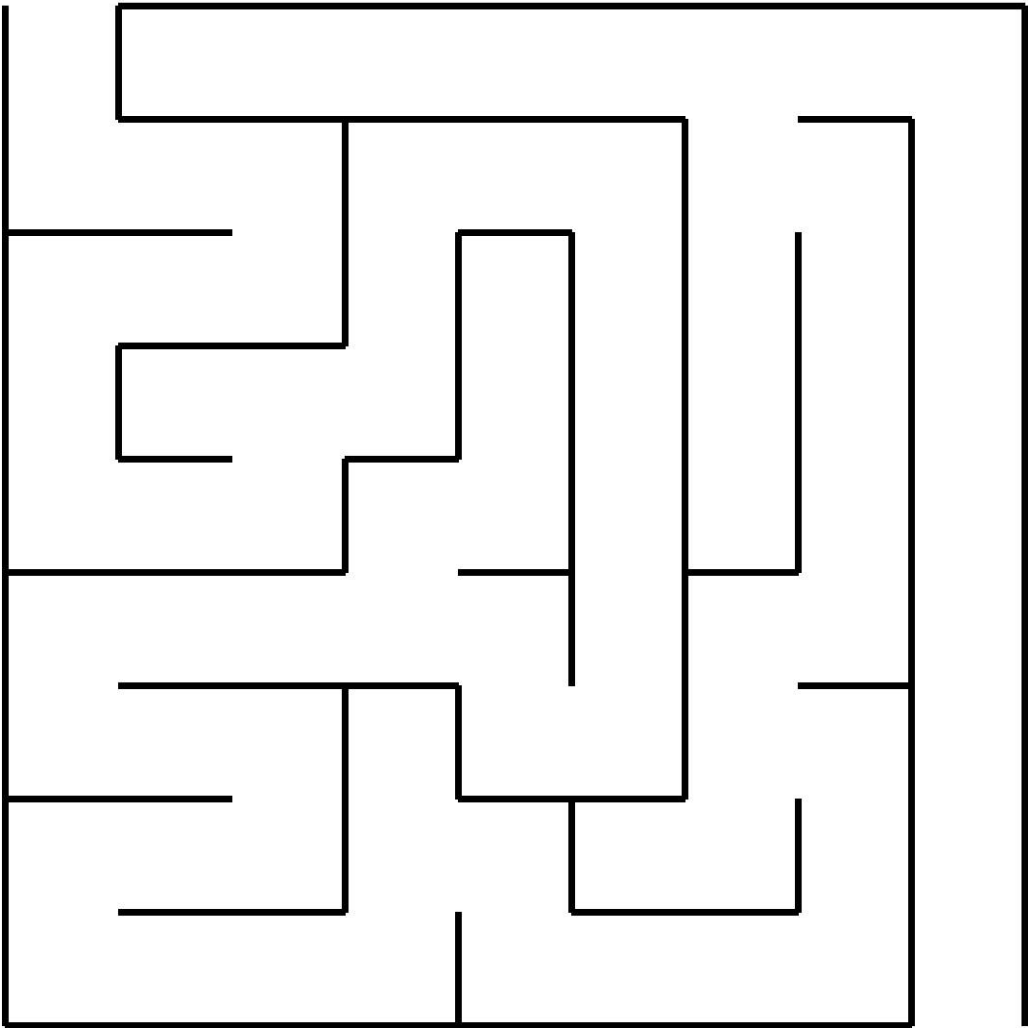

Amazing Maze

Help the little platypus find its mom!

AQUARIUM

The golden poison dart frog is the most poisonous — it's bright yellow and smaller than a bottle cap.

Indigenous people in Colombia used the frogs' poison on their hunting arrows.

Poison dart frogs can be red, blue, yellow, green, or even spotted like strawberries.

Eats: Carnivore (meat)
Habitat: Rainforest floors
Danger: Extremely Dangerous

Poison Dart Frog

South America and Central America

Wild Atlas

Finish Me!

Draw my back legs! Then color me in with bright colors.

Poison Dart Frog
